Advanced Urban Design and Development Training Course

Introduction

Advanced Urban Design and Development Training Course provides a comprehensive, practice-oriented framework for professionals involved in shaping sustainable, inclusive, resilient, and economically productive urban environments. The course explores advanced urban planning, spatial design, land-use integration, transit-oriented development, smart cities, climate-resilient infrastructure, sustainable mobility, urban regeneration, public-realm design, housing, green infrastructure, and digital urban technologies. Participants develop advanced capabilities in urban analysis, master planning, development control, place-making, urban design governance, and evidence-based decision-making while examining contemporary global approaches to rapidly changing cities.

The programme connects strategic urban development with environmental sustainability, social inclusion, economic competitiveness, infrastructure efficiency, and climate adaptation. Participants examine practical tools for transforming urban spaces through integrated development strategies, stakeholder engagement, urban design frameworks, development assessment, and implementation planning. Global case studies provide practical insights from cities including Singapore, London, Copenhagen, Curitiba, Barcelona, Amsterdam, Melbourne, Dubai, Kigali, and Nairobi, enabling participants to compare international practices and adapt relevant approaches to different urban contexts.
