Course Curriculum & Modules

Climate Finance Mobilisation and Investment Structuring Training Course

Introduction

Climate Finance Mobilisation and Investment Structuring Training Course provides comprehensive knowledge and practical skills for identifying, accessing, mobilising and structuring financial resources for climate change mitigation and adaptation projects. The course explores climate finance mechanisms, green investment strategies, blended finance, sustainable infrastructure financing, carbon markets, climate risk assessment and Environmental, Social and Governance (ESG) considerations. Participants will examine how governments, development finance institutions, private investors and international climate funds can collaborate to accelerate climate-resilient development and achieve net-zero emissions targets.

The training further focuses on innovative investment structuring, climate finance instruments, Public-Private Partnerships (PPPs), project bankability, financial modelling and investment risk management. Through international case studies and practical exercises, participants will develop the capacity to prepare bankable climate projects, attract institutional investors, leverage concessional financing and establish sustainable funding frameworks. The course also examines global climate finance trends, including the Green Climate Fund, climate bonds, carbon finance and emerging opportunities in renewable energy, sustainable transport, water management and climate-smart agriculture.

Course Objectives

- Understand global climate finance frameworks and investment trends.
- Develop strategies for climate finance mobilisation and resource allocation.
- Identify innovative green financing and investment opportunities.
- Apply blended finance and concessional financing mechanisms.
- Structure bankable climate mitigation and adaptation projects.
- Evaluate climate investment risks and financial sustainability.
- Develop climate-focused financial models and investment proposals.
- Understand carbon markets and carbon credit financing.
- Apply Environmental, Social and Governance investment principles.
- Mobilise private capital for sustainable infrastructure development.
- Design effective Public-Private Partnerships (PPPs) for climate projects.
- Strengthen climate project feasibility and investment readiness.
- Align climate investments with net-zero and Sustainable Development Goals.

Organizational Benefits

- Improved capacity to mobilise domestic and international climate finance.
- Increased access to green investment opportunities.
- Stronger climate project development and investment structuring.
- Improved financial risk assessment and mitigation.
- Enhanced institutional climate finance management.
- Increased private-sector investment participation.
- Better alignment with global climate financing frameworks.
- Improved project bankability and financial sustainability.
- Stronger partnerships with development finance institutions.
- Enhanced organizational contribution to climate resilience and sustainability.

Target Audiences

- Government policymakers and climate finance officers.
- Development finance institution professionals.
- Investment bankers and financial analysts.
- Climate change and sustainability consultants.
- Renewable energy project developers.
- Infrastructure investment managers.
- Public-Private Partnership (PPP) specialists.
- Corporate finance and ESG professionals.

Course Duration: 10 days

Course Modules

Module 1: Fundamentals of Climate Finance

- Global climate finance architecture and funding principles.
- Climate mitigation and adaptation financing.
- International climate agreements and investment commitments.
- Climate finance flows and emerging market opportunities.
- Institutional roles in climate investment mobilisation.
- Case study: Paris Agreement climate finance commitments.

Module 2: Global Climate Finance Frameworks

- Green Climate Fund financing mechanisms.
- Global Environment Facility funding opportunities.
- Adaptation Fund eligibility and financing.
- Multilateral development bank climate strategies.
- National climate finance frameworks.
- Case study: Green Climate Fund investments in developing countries.

Module 3: Climate Finance Mobilisation Strategies

- Domestic and international resource mobilisation.
- Institutional climate finance fundraising.
- Public and private capital mobilisation.
- Climate investment partnerships.
- Innovative climate funding mechanisms.
- Case study: Rwanda's climate finance mobilisation initiatives.

Module 4: Green Investment and Sustainable Finance

- Principles of sustainable finance.
- Green loans and sustainable investment instruments.
- Green bonds and sustainability-linked bonds.
- ESG investment screening and assessment.
- Green investment portfolio development.
- Case study: European green bond market development.

Module 5: Blended Finance and Concessional Funding

- Blended finance structures and principles.
- Concessional loans and grant financing.
- First-loss capital and risk-sharing mechanisms.
- Catalysing private investment through public funding.
- Development finance institution participation.
- Case study: Scaling Solar blended finance programme in Zambia.

Module 6: Climate Project Identification and Development

- Identifying climate mitigation opportunities.

- Developing climate adaptation projects.
- Climate vulnerability and needs assessments.
- Project concept notes and feasibility studies.
- Climate investment pipeline development.
- Case study: Bangladesh climate-resilient infrastructure projects.

Module 7: Climate Investment Structuring

- Investment structuring principles and methodologies.
- Capital structure and financing arrangements.
- Equity, debt and hybrid financing instruments.
- Investment returns and financial sustainability.
- Structuring climate-resilient investment portfolios.
- Case study: Morocco's Noor solar power investment structure.

Module 8: Financial Modelling and Project Bankability

- Climate project financial modelling.
- Capital expenditure and operational expenditure analysis.
- Net present value and internal rate of return.
- Cash flow projections and debt servicing.
- Investment readiness and bankability assessments.
- Case study: Kenya's Lake Turkana Wind Power project.

Module 9: Climate Risk Assessment and Management

- Physical and transition climate risks.
- Financial exposure and climate stress testing.
- Investment risk allocation strategies.
- Climate risk disclosure and reporting.
- Risk mitigation and resilience planning.
- Case study: Hurricane resilience investments in the Caribbean.

Module 10: Public-Private Partnerships (PPPs) in Climate Finance

- Public-Private Partnership (PPP) financing frameworks.
- Climate infrastructure concession arrangements.
- Risk-sharing and revenue allocation.
- Private investor engagement and negotiations.
- PPP project appraisal and implementation.
- Case study: South Africa's renewable energy independent power producer programme.

Module 11: Carbon Markets and Climate Finance

- Voluntary and compliance carbon markets.
- Carbon credit generation and verification.
- Carbon pricing and emissions trading.
- Article 6 of the Paris Agreement.
- Carbon finance investment opportunities.
- Case study: Switzerland's international carbon credit partnerships.

Module 12: Renewable Energy Investment Financing

- Solar, wind and hydropower financing.
- Renewable energy project investment models.
- Energy transition financing mechanisms.
- Power purchase agreements and revenue structures.
- Renewable energy investment risk management.
- Case study: India's solar energy investment expansion.

Module 13: Climate Adaptation and Resilience Financing

- Climate-resilient infrastructure investments.
- Sustainable water and agricultural financing.
- Disaster risk financing instruments.
- Nature-based solutions and ecosystem investments.
- Adaptation project monitoring and evaluation.
- Case study: Netherlands' Room for the River flood management programme.

Module 14: Climate Finance Governance and Compliance

- Climate finance transparency and accountability.
- Fiduciary standards and financial controls.
- ESG compliance and safeguards.
- Climate investment monitoring and reporting.
- Anti-corruption and investment governance.
- Case study: Green Climate Fund environmental and social safeguards.

Module 15: Climate Investment Strategy and Resource Mobilisation

- Developing institutional climate investment strategies.
- Preparing climate finance proposals.
- Engaging institutional and international investors.
- Climate investment performance measurement.
- Building long-term climate finance partnerships.
- Case study: African Development Bank's Desert to Power initiative.

Training Methodology

- Interactive presentations and expert-led discussions.
- Practical climate finance modelling and investment exercises.
- International case study analysis and group assignments.
- Simulations involving climate investment structuring.
- Project feasibility and bankability assessment exercises.
- Group presentations and collaborative problem-solving.
