Construction Arbitration and Infrastructure Dispute Management Training Course

Introduction

Construction Arbitration and Infrastructure Dispute Management Training Course designed to equip participants with advanced knowledge and practical skills in resolving complex construction, engineering, and infrastructure-related disputes. As infrastructure development continues to expand globally, construction projects increasingly face contractual disagreements, project delays, cost overruns, defective works, variations, payment disputes, unforeseen ground conditions, and contractor performance challenges. These disputes require specialized legal, technical, commercial, and dispute resolution expertise. This course explores the legal and contractual frameworks governing construction projects, with particular emphasis on construction arbitration, international arbitration, infrastructure dispute resolution, FIDIC contracts, construction claims management, delay analysis, quantum assessment, adjudication, mediation, and dispute avoidance. Participants will examine the application of national construction laws, international arbitration rules, standard-form construction contracts, and institutional arbitration procedures in managing disputes arising throughout the infrastructure project lifecycle.

The programme also focuses on practical approaches to managing high-value infrastructure disputes involving roads, bridges, railways, airports, energy facilities, water infrastructure, commercial buildings, and public-private partnership (PPP) projects. Participants will develop expertise in arbitration proceedings, construction contract interpretation, expert witness management, forensic delay analysis, disruption claims, extension of time (EOT), liquidated damages, variation claims, dispute boards, and enforcement of arbitral awards. Through interactive case studies, simulated arbitration hearings, contractual scenario analysis, negotiation exercises, and practical claims evaluation, participants will learn how to identify dispute risks, prepare persuasive arbitration submissions, evaluate technical evidence, and develop effective dispute resolution strategies. The course integrates contemporary developments in international construction law, digital evidence management, infrastructure project governance, ESG-related construction disputes, and cross-border dispute resolution, enabling professionals to minimize litigation exposure, protect contractual interests, improve project delivery, and achieve commercially sustainable dispute outcomes.

Course Duration

10 days

Course Objectives

By the end of this course, participants will be able to:

- Understand advanced principles of construction law, infrastructure contracts, and international construction dispute resolution.
- Interpret FIDIC contracts, EPC agreements, design-build contracts, and other standard construction contract frameworks.
- Apply international arbitration rules and institutional procedures to complex construction and infrastructure disputes.
- Identify, assess, and manage construction claims, contractual risks, and emerging dispute triggers.
- Develop effective strategies for extension of time (EOT), delay claims, disruption claims, and liquidated damages.
- Apply forensic delay analysis techniques, critical path method (CPM), and construction scheduling methodologies.
- Evaluate construction variations, additional payment claims, and quantum assessment methodologies.
- Manage adjudication, mediation, negotiation, and dispute avoidance procedures in infrastructure projects.
- Prepare compelling statements of claim, statements of defence, counterclaims, and arbitration submissions.
- Strengthen expert witness preparation, technical evidence presentation, and cross-examination techniques.
- Understand the role of dispute adjudication boards (DABs), dispute avoidance and adjudication boards (DAABs), and dispute review mechanisms.
- Evaluate enforcement of international arbitral awards, jurisdictional challenges, and cross-border arbitration considerations.
- Develop integrated construction dispute management strategies that improve project governance, contractual compliance, and commercial outcomes.

Target Audience

- Construction lawyers, legal practitioners, and arbitration specialists.

- Civil engineers, structural engineers, and construction professionals.
- Infrastructure project managers and programme directors.
- Contract administrators and commercial managers.
- Quantity surveyors, cost consultants, and claims consultants.
- Arbitrators, mediators, adjudicators, and dispute board members.
- Government infrastructure authorities and public procurement professionals.
- Contractors, developers, consultants, and professionals involved in PPP and EPC projects.

Course Modules

Module 1: Foundations of Construction Law and Infrastructure Dispute Resolution

- Principles and sources of construction and infrastructure law.
- Legal relationships between employers, contractors, consultants, and subcontractors.
- Common causes of construction and engineering disputes.
- Contractual obligations, risk allocation, and project responsibilities.
- Overview of litigation, arbitration, adjudication, and alternative dispute resolution (ADR).
- Case Study: Examination of a major infrastructure project involving disputes between the project owner, engineering consultant, and main contractor over contractual responsibilities and project delivery failures.

Module 2: Construction Contracts and International Contractual Frameworks

- Structure and interpretation of construction contracts.
- FIDIC Red, Yellow, Silver, and other contract forms.
- EPC, turnkey, design-build, and engineering procurement contracts.
- Contract administration, notices, instructions, and contractual deadlines.
- Risk allocation, indemnities, warranties, and limitation of liability.
- Case Study: Analysis of an EPC infrastructure project where conflicting contractual provisions and unclear risk allocation resulted in significant contractor and employer claims.

Module 3: Construction Arbitration Principles and Legal Frameworks

- Fundamentals of domestic and international construction arbitration.
- Arbitration agreements, jurisdiction, and arbitrability.
- UNCITRAL Model Law and international arbitration principles.
- Institutional arbitration rules and procedural frameworks.
- Appointment, independence, impartiality, and powers of arbitrators.
- Case Study: A cross-border highway construction dispute involving jurisdictional objections and competing interpretations of the arbitration agreement.

Module 4: Construction Claims Identification and Management

- Identification and classification of construction claims.
- Employer claims, contractor claims, and subcontractor claims.
- Contractual notices, claim substantiation, and supporting documentation.
- Concurrent claims and cumulative project impacts.
- Claims registers, evidence tracking, and claims management systems.
- Case Study: A contractor submits multiple claims for additional payment arising from delayed approvals, design changes, and restricted site access.

Module 5: Delay Analysis, Extension of Time and Disruption Claims

- Principles of construction delay and disruption analysis.
- Critical path method (CPM) and baseline programme evaluation.
- Time impact analysis and windows analysis.
- Concurrent delay, acceleration, and mitigation strategies.
- Extension of time claims and liquidated damages assessment.
- Case Study: A railway infrastructure project experiences a 12-month delay caused by late design approvals, adverse weather, and contractor underperformance.

Module 6: Variation Orders, Quantum Assessment and Cost Claims

- Identification and valuation of construction variations.

- Additional works, change orders, and scope modifications.
- Loss and expense claims and disruption-related costs.
- Quantum analysis, cost substantiation, and financial documentation.
- Evaluation of prolongation costs, overheads, and lost productivity.
- Case Study: A road construction contractor seeks additional compensation following substantial changes in project specifications and increased material costs.

Module 7: Adjudication, Mediation and Alternative Dispute Resolution

- Principles and procedures of construction adjudication.
- Mediation strategies for infrastructure disputes.
- Negotiation techniques and settlement frameworks.
- Dispute avoidance and early neutral evaluation.
- Managing multi-tier dispute resolution clauses.
- Case Study: A water infrastructure project faces a payment dispute threatening work suspension..

Module 8: Dispute Boards and Infrastructure Project Dispute Avoidance

- Functions and responsibilities of dispute adjudication boards.
- Dispute avoidance and adjudication boards under FIDIC contracts.
- Appointment, jurisdiction, and operational procedures of dispute boards.
- Referral submissions, recommendations, and binding decisions.
- Early intervention and proactive dispute prevention.
- Case Study: A major airport expansion project experiences disagreements over variations and payment certification.

Module 9: Arbitration Proceedings and Procedural Management

- Commencing arbitration and preparing requests for arbitration.
- Statements of claim, defence, counterclaims, and replies.
- Procedural timetables, preliminary meetings, and procedural orders.
- Document production, disclosure, and evidentiary procedures.
- Interim measures, emergency relief, and tribunal case management.
- Case Study: Participants manage a simulated international arbitration involving a contractor's claim for unpaid infrastructure works and the employer's counterclaim for defective construction.

Module 10: Evidence Management and Expert Witness Testimony

- Identifying and preserving documentary and technical evidence.
- Construction records, site diaries, correspondence, and progress reports.
- Role of delay experts, quantum experts, and engineering experts.
- Expert reports, joint statements, and expert conferencing.
- Cross-examination and presentation of technical evidence.
- Case Study: A dispute involving alleged structural defects requires competing engineering experts and forensic cost assessments.

Module 11: Construction Defects, Quality Disputes and Professional Liability

- Defective construction and non-compliance with technical specifications.
- Structural failures, design errors, and workmanship disputes.
- Testing, inspection, certification, and acceptance procedures.
- Professional negligence and consultant liability.
- Warranties, defects liability periods, and remedial obligations.
- Case Study: A bridge infrastructure project develops structural defects shortly after completion.

Module 12: Public Infrastructure, PPP and Procurement Disputes

- Legal and contractual frameworks for PPP infrastructure projects.
- Public procurement regulations and contract award disputes.
- Concession agreements and long-term infrastructure obligations.
- Government intervention, change in law, and political risk.
- Termination, compensation, and public-sector contractual disputes.

• Case Study: A toll-road PPP project experiences disagreements over revenue projections, government obligations, and changes in regulatory requirements.

Module 13: Cross-Border Construction Arbitration and Award Enforcement

- Jurisdictional challenges in international infrastructure arbitration.
- Applicable law, governing law, and conflict-of-laws considerations.
- Recognition and enforcement of foreign arbitral awards.
- New York Convention and international enforcement mechanisms.
- Sovereign immunity, state entities, and enforcement challenges.
- Case Study: An international contractor obtains an arbitral award against a state-owned infrastructure entity but encounters difficulties enforcing the award across multiple jurisdictions.

Module 14: Emerging Issues in Infrastructure Dispute Management

- Digital evidence, electronic records, and construction data analytics.
- Building Information Modelling (BIM) and digital construction disputes.
- Artificial intelligence applications in claims analysis and arbitration support.
- Climate change, ESG compliance, and environmental construction disputes.
- Cybersecurity, supply chain disruptions, and emerging contractual risks.
- Case Study: A large infrastructure project experiences delays following environmental compliance challenges, digital design coordination failures, and supply chain interruptions.

Module 15: Advanced Arbitration Advocacy and Integrated Dispute Strategy

- Developing arbitration case theories and litigation strategies.
- Drafting persuasive arbitration submissions and legal arguments.
- Opening statements, witness examination, and closing submissions.
- Arbitration hearing simulations and tribunal engagement.
- Award analysis, settlement evaluation, and post-award remedies.
- Case Study: Participants undertake a simulated arbitration involving a high-value railway infrastructure contract, featuring delay claims, variations, defective works, quantum disputes, and employer counterclaims.

Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.
