Critical Information Infrastructure Protection and Cyber Regulation Training Course

Introduction

Critical Information Infrastructure Protection and Cyber Regulation Training Course is designed to equip participants with the strategic knowledge, technical competencies, and regulatory expertise required to safeguard essential digital systems, networks, and information assets against increasingly sophisticated cyber threats. As governments, financial institutions, telecommunications providers, energy companies, healthcare organisations, transportation networks, and other essential service providers become increasingly dependent on interconnected digital technologies, protecting Critical Information Infrastructure (CII) has become a national security, economic stability, and organisational resilience priority. This course explores critical infrastructure cybersecurity, cyber regulation and compliance, national cybersecurity frameworks, cyber risk governance, threat intelligence, cyber resilience, infrastructure security assessments, cloud security, operational technology (OT) security, industrial control systems (ICS), data protection, and cybersecurity incident management. Participants will examine the legal, institutional, technological, and operational measures required to protect essential infrastructure against cyberattacks, ransomware, insider threats, supply chain vulnerabilities, espionage, and emerging AI-enabled cyber threats.

The programme further examines the evolving global cybersecurity regulatory landscape, including international cybersecurity standards, national critical infrastructure protection strategies, cross-border cybercrime cooperation, regulatory enforcement, digital sovereignty, and emerging cyber governance obligations. Participants will develop practical capabilities in cybersecurity compliance management, infrastructure threat assessment, security audits, vulnerability management, incident response coordination, business continuity planning, disaster recovery, and cyber crisis leadership. Through practical exercises, regulatory analysis, interactive discussions, and real-world case studies, participants will learn how to establish effective cybersecurity governance structures, implement risk-based protection frameworks, coordinate responses to critical infrastructure incidents, and strengthen institutional preparedness. The training is particularly relevant for organisations seeking to improve cyber maturity, meet regulatory obligations, protect essential digital services, and build sustainable cyber resilience in an increasingly interconnected and threat-intensive digital environment.

Course Duration

10 days

Course Objectives

By the end of this training course, participants will be able to:

- Understand the principles, scope, and strategic importance of Critical Information Infrastructure Protection (CIIP).
- Analyse national cybersecurity policies, cyber laws, regulatory frameworks, and international security standards.
- Identify and classify critical information infrastructure assets, systems, and essential digital services.
- Conduct advanced cybersecurity risk assessments, threat modelling, and infrastructure vulnerability analysis.
- Develop effective cybersecurity governance, risk management, and compliance (GRC) frameworks.
- Strengthen Operational Technology (OT), Industrial Control Systems (ICS), and Supervisory Control and Data Acquisition (SCADA) security.
- Implement advanced threat intelligence, cyber threat detection, and security monitoring strategies.
- Develop effective cyber incident response, crisis management, and digital forensics capabilities.
- Evaluate third-party cybersecurity risks, digital supply chain vulnerabilities, and cloud infrastructure threats.
- Apply data protection, privacy regulations, and cybersecurity compliance requirements.
- Design business continuity management, disaster recovery, and cyber resilience programmes.
- Strengthen cross-border cybersecurity cooperation, cybercrime prevention, and information-sharing mechanisms.
- Develop strategic approaches to emerging cybersecurity challenges, including AI-driven threats, quantum computing risks, and evolving digital regulations.

Target Audience

- Chief Information Security Officers (CISOs), Chief Information Officers (CIOs), and Chief Technology Officers (CTOs).
- Cybersecurity analysts, information security specialists, and IT security managers.
- Government officials responsible for national cybersecurity policy and critical infrastructure protection.
- Regulatory authorities, compliance officers, and cybersecurity law enforcement professionals.
- Telecommunications, energy, utilities, banking, and financial services professionals.
- Risk management, enterprise governance, and business continuity professionals.
- Industrial control systems, OT security, and network infrastructure engineers.
- Legal practitioners, data protection officers, cybersecurity consultants, and digital transformation leaders.

Course Modules

Module 1: Fundamentals of Critical Information Infrastructure Protection

- Understanding Critical Information Infrastructure (CII) and its strategic importance.

- Identifying essential services and nationally significant digital assets.
- Critical infrastructure sectors
- Interdependencies between physical infrastructure and digital ecosystems.
- Principles of infrastructure resilience, protection, and national security.
- Case Study: Examining the 2021 Colonial Pipeline ransomware attack and its impact on fuel distribution, public services, and critical infrastructure resilience.

Module 2: National Cybersecurity Strategies, Policies and Regulatory Frameworks

- Developing national cybersecurity strategies and implementation roadmaps.
- Legal foundations of critical information infrastructure protection.
- Roles of national cybersecurity agencies and regulatory institutions.
- National cybersecurity policies and institutional accountability.
- International cybersecurity cooperation and regulatory harmonisation.
- Case Study: Evaluating how the European Union's NIS2 Directive strengthens cybersecurity obligations and oversight across essential and important entities.

Module 3: Cyber Risk Assessment and Critical Infrastructure Threat Modelling

- Identifying critical assets, threats, vulnerabilities, and security exposures.
- Conducting enterprise-wide cybersecurity risk assessments.
- Applying threat modelling and attack surface management techniques.
- Evaluating operational, financial, reputational, and national security risks.
- Developing risk treatment plans and infrastructure protection priorities.
- Case Study: Assessing the cyber risks associated with interconnected electricity transmission networks and identifying potential points of compromise.

Module 4: Cybersecurity Governance, Risk Management and Compliance (GRC)

- Establishing cybersecurity governance structures and accountability frameworks.
- Integrating cybersecurity into enterprise risk management.
- Implementing ISO/IEC 27001 information security management systems.
- Applying NIST Cybersecurity Framework principles.
- Developing regulatory compliance monitoring and assurance mechanisms.
- Case Study: Reviewing the implementation of an enterprise-wide cybersecurity governance framework in a multinational financial institution.

Module 5: Operational Technology (OT), Industrial Control Systems (ICS) and SCADA Security

- Understanding industrial control systems and operational technology environments.
- Identifying vulnerabilities in SCADA and industrial automation networks.
- Securing industrial communication protocols and connected devices.
- Implementing IT/OT network segmentation and access controls.
- Managing legacy systems and industrial cybersecurity risks.
- Case Study: Analysing the 2015 Ukraine power grid cyberattack and its implications for electricity infrastructure protection.

Module 6: Advanced Cyber Threat Intelligence and Security Monitoring

- Understanding advanced persistent threats (APTs) and cyber espionage.
- Implementing threat intelligence collection and analysis.
- Using Security Information and Event Management (SIEM) systems.
- Applying Extended Detection and Response (XDR) capabilities.
- Developing proactive threat hunting and security monitoring programmes.
- Case Study: Examining the SolarWinds supply chain compromise and the importance of threat intelligence and continuous monitoring.

Module 7: Critical Infrastructure Network and Cloud Security

- Designing secure network architectures for critical infrastructure.
- Implementing zero-trust architecture and identity-centric security.
- Securing cloud computing, hybrid infrastructure, and virtual environments.
- Managing network segmentation, encryption, and privileged access.
- Addressing Internet of Things (IoT) and edge computing vulnerabilities.

• Case Study: Evaluating a cloud security incident involving a critical service provider and developing a zero-trust security improvement plan.

Module 8: Cybersecurity Incident Response and Digital Forensics

• Establishing cyber incident response policies and procedures.

• Detecting, classifying, and prioritising cybersecurity incidents.

• Coordinating incident containment, eradication, and recovery.

• Applying digital forensics and evidence preservation techniques.

• Managing cyber incident reporting and regulatory notifications.

• Case Study: Analysing the 2021 Ireland Health Service Executive ransomware attack and evaluating incident response and recovery challenges.

Module 9: Cybercrime Law, Digital Evidence and Cyber Regulatory Enforcement

• Understanding national cybercrime legislation and enforcement mechanisms.

• Investigating unauthorised access, cyber fraud, and digital attacks.

• Legal admissibility and preservation of electronic evidence.

• Cross-border cybercrime investigations and international cooperation.

• Regulatory investigations, penalties, and institutional accountability.

• Case Study: Examining international legal cooperation in investigating a ransomware operation involving multiple jurisdictions.

Module 10: Data Protection, Privacy and Information Security Regulation

• Understanding data protection laws and privacy regulatory requirements.

• Applying GDPR principles and other relevant data protection frameworks.

• Managing personal data security and sensitive information.

• Implementing data governance, retention, and access management policies.

• Handling data breaches and regulatory notification obligations.

• Case Study: Reviewing a major personal data breach and evaluating the regulatory, operational, and reputational consequences for the affected organisation.

Module 11: Third-Party Risk Management and Cyber Supply Chain Security

• Identifying cybersecurity risks across external service providers.

• Conducting vendor security assessments and due diligence.

• Securing software supply chains and outsourced IT services.

• Managing third-party access to critical infrastructure systems.

• Developing contractual cybersecurity requirements and supplier monitoring mechanisms.

• Case Study: Analysing the Kaseya ransomware incident and its implications for managed service providers and downstream organisations.

Module 12: Business Continuity, Disaster Recovery and Cyber Resilience

• Developing business continuity management frameworks.

• Designing disaster recovery strategies for critical digital systems.

• Establishing recovery time objectives (RTOs) and recovery point objectives (RPOs).

• Implementing backup, redundancy, and system restoration controls.

• Conducting cyber crisis simulations and infrastructure resilience exercises.

• Case Study: Developing a disaster recovery and continuity plan for a national banking payment infrastructure following a major cyber disruption.

Module 13: Emerging Technologies, Artificial Intelligence and Future Cyber Threats

• Understanding AI-enabled cyberattacks and automated threat capabilities.

• Securing artificial intelligence systems and machine learning environments.

• Assessing quantum computing implications for cryptographic security.

• Addressing emerging risks associated with 5G, IoT, and smart infrastructure.

• Exploring post-quantum cryptography and future-ready security architecture.

• Case Study: Simulating an AI-assisted phishing and ransomware campaign targeting a telecommunications operator and evaluating appropriate defensive measures.

Module 14: International Cybersecurity Standards and Cross-Border Cooperation

• Examining international cybersecurity conventions and cooperation frameworks.

- Understanding the Budapest Convention on Cybercrime.
- Applying ISO/IEC 27001, ISO 22301, and relevant NIST guidance.
- Strengthening information sharing between national cybersecurity agencies.
- Managing jurisdictional challenges and international cyber incident coordination.
- Case Study: Evaluating international cooperation in responding to a cyberattack affecting financial institutions and digital infrastructure across several countries.

Module 15: Cybersecurity Auditing, Regulatory Readiness and Strategic Infrastructure Protection

- Conducting critical infrastructure cybersecurity audits and maturity assessments.
- Developing regulatory compliance and assurance programmes.
- Establishing cybersecurity performance indicators and reporting dashboards.
- Preparing strategic cyber protection and investment roadmaps.
- Developing organisational cyber resilience and continuous improvement plans.
- Case Study: Conducting a simulated cybersecurity regulatory audit of a national electricity utility, identifying compliance gaps, and developing a critical infrastructure protection improvement roadmap.

Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.
