Cybercrime Investigation and Digital Criminal Evidence Training Course

Introduction

Cybercrime Investigation and Digital Criminal Evidence Training Course is designed to equip law enforcement officers, criminal investigators, digital forensic specialists, prosecutors, cybersecurity professionals, and legal practitioners with advanced knowledge and practical skills for investigating cyber-enabled and cyber-dependent crimes. As digital transformation continues to reshape financial services, government operations, communication systems, and business transactions, cybercriminal activities such as hacking, ransomware attacks, identity theft, online fraud, cryptocurrency-related crimes, phishing, data breaches, cyberstalking, and digital financial fraud are becoming increasingly sophisticated. Effective investigation requires specialized expertise in cybercrime detection, digital forensics, electronic evidence collection, cyber threat intelligence, incident response, network forensics, mobile device investigations, and cybercriminal attribution. This training provides participants with a structured understanding of modern cybercrime investigation methodologies, applicable legal frameworks, digital evidence preservation procedures, and internationally recognized forensic standards.

The programme emphasizes practical investigative techniques, forensic technologies, legal admissibility, and evidence-based prosecution strategies necessary to address complex digital criminal investigations. Participants will explore computer and mobile device forensics, cloud investigations, dark web intelligence, cryptocurrency tracing, email and social media investigations, malware analysis, network traffic analysis, digital chain of custody, and electronic evidence authentication. Through practical exercises, simulated cybercrime investigations, forensic case studies, and courtroom evidence presentation scenarios, participants will develop the capacity to identify cyber threats, acquire and preserve digital evidence, reconstruct cyber incidents, trace suspicious digital activities, and support successful criminal prosecutions. The course also examines emerging challenges associated with artificial intelligence-driven cybercrime, deepfakes, encrypted communications, cross-border investigations, data protection, and international cybercrime cooperation, enabling participants to strengthen investigative capabilities and respond effectively to the evolving digital crime landscape.

Course Duration

10 days

Course Objectives

By the end of this training course, participants should be able to:

- Understand contemporary cybercrime trends, cyber threat landscapes, and digital criminal investigation frameworks.
- Apply advanced digital forensic investigation techniques to identify, acquire, preserve, and analyze electronic evidence.
- Conduct systematic computer forensic examinations involving desktops, laptops, servers, and storage devices.
- Investigate mobile device crimes using smartphone forensics, application analysis, and communication data examination.
- Apply effective cyber incident response and forensic readiness strategies during cybercrime investigations.
- Analyze network traffic, system logs, IP addresses, and digital footprints to reconstruct cyber incidents.
- Identify and investigate ransomware, malware, phishing, hacking, and advanced persistent threat activities.
- Apply digital evidence preservation, authentication, integrity verification, and chain of custody procedures.
- Investigate online financial fraud, cryptocurrency transactions, identity theft, and digital payment crimes.
- Utilize open-source intelligence (OSINT), social media intelligence (SOCMINT), and threat intelligence in criminal investigations.
- Understand legal requirements governing electronic evidence admissibility, privacy, and lawful digital investigations.
- Develop effective cybercrime prosecution strategies and present complex forensic findings in court.
- Strengthen capabilities in cross-border cybercrime investigations, international cooperation, and emerging technology crime detection.

Target Audience

- Police officers, detectives, and criminal investigation department (CID) personnel.
- Digital forensic analysts and cybercrime investigation specialists.
- Prosecutors, public attorneys, and criminal justice professionals.
- Judges, magistrates, and legal practitioners handling cybercrime cases.
- Cybersecurity professionals, incident responders, and information security managers.
- Intelligence officers, national security personnel, and law enforcement agencies.
- Financial crime investigators, anti-money laundering specialists, and fraud examiners.
- Government regulators, digital evidence officers, and compliance professionals.

Course Modules

Module 1: Introduction to Cybercrime and Digital Criminal Investigations

- Understanding cybercrime classifications and modern digital criminal activities.
- Cyber-dependent crimes versus cyber-enabled crimes.
- Global cybercrime trends, emerging threats, and criminal methodologies.

• Cybercriminal profiles, motivations, and operational techniques.

• Overview of cybercrime investigation frameworks and investigative lifecycle.

• Case Study: Investigating a coordinated cybercrime operation involving phishing, identity theft, and unauthorized access to a commercial banking platform.

Module 2: Cybercrime Legislation and Legal Investigation Frameworks

• Overview of national cybercrime legislation and international legal frameworks.

• Understanding the Budapest Convention on Cybercrime and international cooperation.

• Legal authority for searches, seizures, and digital evidence acquisition.

• Privacy rights, data protection, and lawful access to electronic information.

• Electronic evidence admissibility and procedural compliance requirements.

• Case Study: Examining a cyber-fraud investigation involving electronic evidence obtained from multiple jurisdictions and evaluating its legal admissibility.

Module 3: Digital Forensics Fundamentals and Investigation Methodologies

• Principles, objectives, and methodologies of digital forensic investigations.

• Digital forensic lifecycle: identification, preservation, acquisition, examination, and reporting.

• Forensic readiness and incident evidence preservation planning.

• Introduction to forensic tools, technologies, and laboratory procedures.

• Maintaining forensic integrity, repeatability, and investigative documentation.

• Case Study: Conducting a forensic investigation of a company workstation suspected of being used to facilitate unauthorized financial transactions.

Module 4: Computer Forensics and Storage Device Investigations

• Forensic examination of desktops, laptops, servers, and removable storage devices.

• File system analysis and recovery of deleted digital information.

• Disk imaging, forensic duplication, and write-blocking techniques.

• Examination of metadata, file timestamps, and user activity records.

• Identification of suspicious files, unauthorized access, and data exfiltration.

• Case Study: Recovering deleted financial records and identifying evidence of unauthorized data transfers from a seized company laptop.

Module 5: Mobile Device Forensics and Smartphone Investigations

• Mobile device forensic investigation principles and procedures.

• Android and iOS forensic acquisition and examination.

• Analysis of call logs, SMS, messaging applications, and contact records.

• Recovery and examination of mobile application data and location records.

• Mobile evidence preservation, encryption challenges, and reporting.

• Case Study: Investigating a mobile money fraud network using smartphone communications, transaction records, and application-generated evidence.

Module 6: Network Forensics and Cyber Incident Reconstruction

• Network forensic investigation methodologies and evidence sources.

• Analysis of network traffic, packet captures, and communication protocols.

• Examination of IP addresses, DNS records, and connection logs.

• Identifying unauthorized network access and suspicious communication patterns.

• Reconstructing cyber incidents through network event correlation.

• Case Study: Tracing a network intrusion that resulted in unauthorized access to a government institution's information systems.

Module 7: Malware Analysis, Ransomware, and Advanced Cyber Threats

• Understanding malware types, delivery mechanisms, and infection pathways.

• Introduction to static and dynamic malware analysis.

• Investigating ransomware attacks and malicious encryption activities.

• Identifying command-and-control infrastructure and malware indicators.

• Analyzing advanced persistent threats (APTs) and targeted cyberattacks.

• Case Study: Investigating a ransomware incident affecting a healthcare organization and reconstructing the attacker's activities using forensic evidence.

Module 8: Email Forensics, Social Media, and Online Investigations

- Email header analysis and sender identification techniques.
- Investigating phishing campaigns and business email compromise (BEC).
- Social media intelligence and digital footprint investigations.
- Examination of online communications, accounts, and suspicious interactions.
- Preserving web-based evidence and documenting online investigative findings.
- Case Study: Investigating an executive impersonation scam involving fraudulent emails, manipulated identities, and unauthorized payment instructions.

Module 9: Cryptocurrency Investigations and Digital Financial Crimes

- Understanding cryptocurrency ecosystems and blockchain fundamentals.
- Cryptocurrency fraud, wallet theft, scams, and illicit financial transactions.
- Blockchain transaction tracing and wallet attribution techniques.
- Investigating cryptocurrency exchanges and virtual asset service providers.
- Collaboration with financial intelligence units and digital asset investigators.
- Case Study: Tracing suspicious cryptocurrency transactions associated with an online investment fraud scheme and identifying potential links between digital wallets.

Module 10: Open-Source Intelligence (OSINT) and Cyber Threat Intelligence

- OSINT principles and methodologies for cybercrime investigations.
- Digital footprint collection and online identity analysis.
- Domain intelligence, IP reputation, and infrastructure investigations.
- Cyber threat intelligence platforms, indicators of compromise, and attribution.
- Ethical, legal, and operational considerations in intelligence gathering.
- Case Study: Using publicly available digital information to investigate a suspected online fraud network operating through multiple websites and social media accounts.

Module 11: Cloud Forensics and Emerging Digital Evidence Sources

- Cloud computing environments and digital evidence challenges.
- Investigating cloud storage, SaaS platforms, and hosted infrastructure.
- Acquisition and preservation of cloud-based electronic evidence.
- Cloud audit logs, access records, and user activity analysis.
- Cross-border cloud evidence access and service provider cooperation.
- Case Study: Investigating unauthorized access to an organization's cloud environment and identifying evidence of confidential document exfiltration.

Module 12: Digital Evidence Collection, Preservation, and Chain of Custody

- Procedures for identifying and collecting electronic evidence at crime scenes.
- Forensic imaging, cryptographic hashing, and evidence integrity verification.
- Establishing and maintaining digital chain of custody documentation.
- Secure storage, evidence handling, and access control procedures.
- Preventing evidence contamination, alteration, and loss.
- Case Study: Examining a criminal investigation in which improperly handled digital evidence creates questions about authenticity, integrity, and admissibility.

Module 13: Dark Web Investigations and Advanced Cybercrime Operations

- Understanding dark web technologies, anonymity networks, and hidden services.
- Investigating underground cybercrime marketplaces and illicit online activities.
- Identifying cybercriminal infrastructure and digital transaction patterns.
- Investigating stolen credentials, illicit data trading, and cybercrime services.
- Operational security, investigator safety, and lawful evidence collection.
- Case Study: Investigating an online marketplace distributing stolen financial credentials and examining the digital evidence associated with its operators.

Module 14: Artificial Intelligence, Deepfakes, and Emerging Cybercrime Threats

- Understanding AI-enabled cybercrime and automated criminal operations.
- Detecting and investigating deepfake audio, video, and identity manipulation.
- Generative AI-powered phishing, social engineering, and impersonation attacks.
- Synthetic identities, automated fraud, and emerging digital deception techniques.
- Digital authenticity verification and emerging forensic detection technologies.
- Case Study: Investigating an AI-generated executive voice impersonation incident used to authorize fraudulent corporate financial transfers.

Module 15: Digital Evidence Reporting, Courtroom Presentation, and International Cooperation

- Preparing comprehensive digital forensic investigation reports.
- Explaining forensic methodologies and technical findings to non-technical audiences.
- Expert witness preparation and courtroom presentation of electronic evidence.
- International cybercrime cooperation, mutual legal assistance, and evidence sharing.
- Developing prosecution-ready digital evidence packages and investigative recommendations.
- Case Study: Preparing and presenting a complete digital forensic evidence report in a simulated cross-border cybercrime prosecution involving financial fraud and unauthorized computer access.

Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.
