Digital Forensics, Cybercrime Investigation and Legal Evidence Training Course

Introduction

Digital Forensics, Cybercrime Investigation and Legal Evidence Training Course is designed to equip participants with advanced knowledge and practical competencies in digital forensic investigations, cybercrime detection, electronic evidence collection, cyber incident response, and legal evidence management. As organisations, governments, financial institutions and law enforcement agencies increasingly depend on digital technologies, cyber-enabled offences such as identity theft, online fraud, ransomware attacks, data breaches, financial cybercrime, digital impersonation and unauthorised system access continue to present significant investigative and legal challenges. This course explores the latest developments in digital forensic science, cyber threat intelligence, computer forensics, mobile device forensics, network traffic analysis, cloud forensics, cryptocurrency investigations and artificial intelligence-assisted cybercrime detection. Participants will develop practical skills in identifying digital crime indicators, preserving electronic evidence, conducting forensic examinations and applying internationally recognised forensic investigation standards.

The programme further examines the legal, procedural and evidentiary requirements governing the collection, preservation, analysis, presentation and admissibility of digital evidence in criminal and civil proceedings. It provides an in-depth understanding of digital chain of custody, electronic evidence authentication, cybercrime legislation, data protection, privacy rights, forensic reporting, expert witness testimony and courtroom presentation of digital evidence. Through practical exercises, simulated cybercrime investigations, forensic case studies and evidence analysis workshops, participants will learn how to conduct defensible investigations while maintaining evidentiary integrity and compliance with applicable laws. Particular attention is given to emerging challenges involving cross-border cybercrime, encrypted communications, digital financial transactions, cryptocurrency tracing, cloud-hosted evidence and AI-generated digital content. By the end of the course, participants will be better equipped to investigate complex cyber incidents, support criminal prosecution, strengthen institutional cybersecurity capabilities and ensure that digital evidence is reliable, legally obtained and suitable for judicial proceedings.

Course Duration

10 days

Course Objectives

By the end of this course, participants will be able to:

- Understand the principles, methodologies and applications of modern digital forensic investigation.
- Identify, investigate and analyse different forms of cybercrime and cyber-enabled criminal activities.
- Apply advanced techniques for computer, mobile device and network forensics.
- Conduct systematic digital evidence identification, acquisition, preservation and examination.
- Implement effective digital chain of custody and evidence integrity management procedures.
- Utilise forensic tools and technologies for data recovery, forensic imaging and artefact analysis.
- Analyse network traffic, system logs and malware indicators to reconstruct cyber incidents.
- Apply relevant cybercrime legislation, electronic evidence laws and digital investigation standards.
- Evaluate the admissibility, authenticity, relevance and reliability of electronic evidence.
- Investigate online financial fraud, identity theft, cryptocurrency-related offences and digital payment crimes.
- Apply cloud forensics and cross-border digital evidence collection techniques.
- Prepare professional forensic investigation reports and deliver credible expert witness testimony.
- Strengthen cyber incident response, digital evidence governance and criminal prosecution readiness.

Target Audience

- Law enforcement officers, police investigators and criminal investigation professionals.
- Digital forensic analysts, cybercrime investigators and cybersecurity specialists.
- Prosecutors, public defenders, criminal lawyers and legal practitioners.
- Judges, magistrates and judicial officers involved in electronic evidence matters.
- Intelligence officers, national security professionals and investigative agencies.
- IT auditors, information security managers and incident response teams.
- Banking, financial services and fintech fraud investigation professionals.
- Government regulators, compliance officers and data protection professionals.

Course Modules

Module 1: Fundamentals of Digital Forensics and Cybercrime Investigation

- Introduction to digital forensic science and forensic investigation principles.
- Evolution, classification and characteristics of modern cybercrime.
- Digital evidence sources, types and investigative significance.

- Digital forensic investigation lifecycle and standard operating procedures.
- Roles and responsibilities of digital forensic investigators.
- Case Study: Investigating a corporate data breach involving unauthorised access, stolen customer information and suspicious employee activity.

Module 2: Digital Evidence Identification, Collection and Preservation

- Identifying potential sources of electronic and digital evidence.
- Evidence acquisition techniques for computers, servers and storage devices.
- Forensic imaging and bit-by-bit data duplication.
- Evidence preservation, integrity verification and hash analysis.
- Documentation of evidence collection procedures and investigative activities.
- Case Study: Preserving digital evidence from a suspect's computer following allegations of intellectual property theft.

Module 3: Computer Forensics and Operating System Analysis

- Windows, Linux and macOS forensic investigation techniques.
- File system structures, metadata and deleted file recovery.
- Registry analysis, system logs and user activity reconstruction.
- Browser history, downloads and application artefact examination.
- Timeline analysis and reconstruction of computer-based activities.
- Case Study: Reconstructing the activities of an employee suspected of accessing confidential organisational files before leaving the company.

Module 4: Mobile Device Forensics and Smartphone Investigations

- Mobile forensic principles and investigative methodologies.
- Android and iOS device acquisition and examination.
- Analysis of SMS, call records, contacts and application data.
- Examination of messaging applications and multimedia evidence.
- Mobile device location data and digital activity reconstruction.
- Case Study: Investigating a mobile money fraud incident using smartphone communications, transaction records and recovered digital artefacts.

Module 5: Network Forensics and Cyberattack Investigation

- Network forensic principles and traffic monitoring.
- Packet capture, protocol analysis and network reconstruction.
- Firewall logs, intrusion detection records and server log examination.
- Investigation of unauthorised network access and data exfiltration.
- Identification of attack vectors, suspicious IP activity and intrusion indicators.
- Case Study: Investigating a network intrusion involving compromised credentials, unauthorised access and confidential data extraction.

Module 6: Malware Analysis, Ransomware and Digital Threat Investigation

- Fundamentals of malware identification and classification.
- Static and dynamic malware analysis concepts.
- Investigation of ransomware attacks and malicious software infections.
- Examination of persistence mechanisms and system compromise indicators.
- Malware evidence documentation and incident reconstruction.
- Case Study: Analysing a ransomware incident affecting a financial institution and reconstructing the attack timeline using forensic artefacts.

Module 7: Cloud Forensics and Distributed Digital Evidence

- Cloud computing architecture and forensic investigation challenges.
- Evidence acquisition from cloud storage and hosted platforms.
- Analysis of cloud access logs, audit trails and user activities.
- Multi-cloud environments and distributed evidence preservation.
- Legal and jurisdictional considerations in cloud evidence collection.
- Case Study: Investigating unauthorised access to confidential files stored on a cloud collaboration platform.

Module 8: Cybercrime Intelligence, OSINT and Digital Attribution

- Open-source intelligence (OSINT) investigation methodologies.

- Digital footprint analysis and online identity investigation.
- Social media intelligence and online activity monitoring.
- Digital attribution, correlation and investigative limitations.
- Ethical and legal considerations in intelligence gathering.
- Case Study: Tracing an online impersonation and social engineering operation using publicly available digital information.

Module 9: Financial Cybercrime, Cryptocurrency and Blockchain Forensics

- Investigation of online banking fraud and electronic payment crimes.
- Cryptocurrency transaction tracing and blockchain analysis.
- Examination of digital wallets and virtual asset transactions.
- Identification of suspicious financial transaction patterns.
- Digital evidence requirements in financial crime prosecution.
- Case Study: Investigating a cryptocurrency investment scam involving multiple digital wallets and cross-border fund transfers.

Module 10: Digital Evidence Authentication, Integrity and Chain of Custody

- Principles of electronic evidence authenticity and reliability.
- Digital hashing, forensic verification and integrity controls.
- Chain of custody documentation and evidence tracking.
- Prevention of evidence contamination, alteration and unauthorised access.
- Legal standards governing electronic evidence preservation.
- Case Study: Evaluating disputed electronic evidence in a criminal investigation where the defence challenges the integrity of the original forensic image.

Module 11: Cybercrime Legislation and Legal Frameworks for Digital Evidence

- Overview of national and international cybercrime legal frameworks.
- Electronic transactions, digital records and admissibility requirements.
- Legal procedures for search, seizure and forensic examination.
- Data protection, privacy rights and lawful access to digital information.
- International cooperation, mutual legal assistance and cross-border investigations.
- Case Study: Examining a cross-border cyber fraud investigation involving electronic evidence obtained from multiple jurisdictions.

Module 12: Digital Forensic Tools, Techniques and Practical Laboratory Exercises

- Introduction to leading digital forensic investigation platforms.
- Forensic acquisition, imaging and data recovery exercises.
- Practical analysis of computer, mobile and network artefacts.
- Examination of deleted files, metadata and digital timelines.
- Forensic validation, quality assurance and technical documentation.
- Case Study: Conducting a simulated forensic laboratory investigation involving a compromised workstation, recovered files and suspicious user activity.

Module 13: Cyber Incident Response and Advanced Investigation Techniques

- Digital incident response frameworks and investigation coordination.
- Incident triage, evidence prioritisation and containment considerations.
- Investigation of advanced persistent threats and insider threats.
- Integration of cyber threat intelligence into forensic investigations.
- Post-incident analysis, root cause identification and lessons learned.
- Case Study: Responding to a coordinated cyberattack involving compromised employee accounts, data leakage and disruption of business operations.

Module 14: Digital Forensic Reporting, Expert Witness Testimony and Courtroom Presentation

- Structure and preparation of professional forensic investigation reports.
- Presentation of technical findings in clear legal language.
- Expert witness responsibilities and professional ethics.
- Explaining forensic methodologies and evidentiary limitations in court.
- Cross-examination preparation and defence of forensic conclusions.

• Case Study: Preparing an expert forensic report and presenting digital evidence in a simulated criminal trial involving online financial fraud.

Module 15: Emerging Technologies, AI and Future Challenges in Digital Forensics

• Artificial intelligence and machine learning in forensic investigations.
• Deepfake detection and investigation of synthetic digital evidence.
• Forensic challenges involving encrypted communications and privacy technologies.
• Internet of Things (IoT), connected devices and emerging evidence sources.
• Future trends in cybercrime investigation, digital evidence and forensic regulation.
• Case Study: Investigating a digital impersonation case involving AI-generated audio, manipulated video and disputed electronic communications.

Training Methodology

• Interactive lectures and presentations.
• Group discussions and brainstorming sessions.
• Hands-on exercises using real-world datasets.
• Role-playing and scenario-based simulations.
• Analysis of case studies to bridge theory and practice.
• Peer-to-peer learning and networking.
• Expert-led Q&A sessions.
• Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

• Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
• Post-training mentorship, access to class resources, and customized follow-up support.
• Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.
