Course Curriculum & Modules

International Environmental Law and Global Climate Governance Training Course

Introduction

International Environmental Law and Global Climate Governance Training Course is designed to equip participants with advanced knowledge and practical skills in international environmental law, global climate policy, environmental diplomacy, and sustainable development governance. As climate change, biodiversity loss, environmental pollution, and natural resource depletion increasingly threaten global economic stability and human security, governments, international institutions, corporations, and development organizations must strengthen their environmental regulatory frameworks and climate governance mechanisms. This course explores the foundations of international environmental law, multilateral environmental agreements, international climate negotiations, environmental human rights, transboundary environmental liability, and the legal responsibilities of states and non-state actors. Participants will examine major international frameworks, including the United Nations Framework Convention on Climate Change (UNFCCC), the Paris Agreement, the Convention on Biological Diversity (CBD), the Convention on International Trade in Endangered Species (CITES), and other critical global environmental treaties.

The programme emphasizes the intersection of climate change law, environmental compliance, ESG governance, carbon markets, climate finance, environmental justice, and international sustainability regulations. Participants will develop practical competencies in interpreting international environmental obligations, assessing state responsibility, designing climate policies, negotiating environmental agreements, managing cross-border environmental disputes, and strengthening institutional accountability. Through contemporary case studies, policy simulations, legal analysis, and practical exercises, delegates will explore emerging developments such as climate litigation, carbon pricing, loss and damage financing, climate adaptation, biodiversity protection, and the global transition to net-zero economies. By the end of the training, participants will be better positioned to influence environmental policymaking, support climate-resilient development, advise on international environmental compliance, and contribute to effective global climate governance and sustainable development strategies.

Course Duration

10 days

Course Objectives

By the end of this training course, participants will be able to:

- Understand the fundamental principles, sources, and evolution of international environmental law and global environmental governance.
- Interpret major multilateral environmental agreements and assess their implications for national legislation and international cooperation.
- Analyze the legal obligations of states under the Paris Agreement and UNFCCC climate framework.
- Evaluate state responsibility, environmental liability, and accountability for transboundary environmental harm.
- Develop effective climate change mitigation and adaptation policies aligned with global climate commitments.
- Understand international climate negotiations, environmental diplomacy, and multilateral decision-making processes.
- Assess emerging developments in climate litigation, environmental justice, and human rights protection.
- Examine the legal and institutional frameworks governing carbon markets, emissions trading, and carbon pricing.
- Evaluate climate finance mechanisms, green investment frameworks, and loss and damage funding arrangements.
- Strengthen environmental impact assessment, strategic environmental assessment, and regulatory compliance practices.
- Apply international biodiversity conservation frameworks and ecosystem protection principles.
- Analyze ESG governance, corporate environmental accountability, and sustainable business compliance.
- Formulate innovative legal and policy solutions supporting global climate resilience, environmental sustainability, and net-zero development.

Target Audience

- Government officials and policymakers working in environmental protection, climate change, and natural resource management.
- Environmental lawyers, legal consultants, advocates, and international law practitioners.

- Climate change specialists, environmental scientists, and sustainability professionals.
- Diplomats, foreign affairs officers, and international relations practitioners.
- UN agencies, international organizations, NGOs, and multilateral development institution professionals.
- Corporate sustainability managers, ESG officers, and environmental compliance professionals.
- Environmental regulators, auditors, and enforcement authorities.
- Academics, researchers, development consultants, and professionals involved in climate governance and sustainable development.

Course Modules

Module 1: Foundations and Principles of International Environmental Law

- Historical evolution and development of international environmental law.
- Sources of international environmental law and customary international law.
- Core principles: precautionary principle, prevention, and sustainable development.
- Polluter Pays Principle and Common but Differentiated Responsibilities (CBDR-RC).
- Relationship between international environmental law and national legal systems.
- Case Study: The Trail Smelter Arbitration – examining transboundary pollution, state responsibility, and the prevention of environmental harm.

Module 2: Global Environmental Governance and Institutional Frameworks

- Structure and functions of the United Nations Environment Programme (UNEP).
- Roles of international environmental institutions and specialized agencies.
- Global environmental governance and multilateral cooperation.
- Institutional coordination between governments and international organizations.
- Environmental policy implementation, monitoring, and accountability.
- Case Study: UNEP's role in strengthening international environmental cooperation and coordinating responses to global environmental challenges.

Module 3: International Climate Change Law and the UNFCCC Framework

- Evolution and objectives of the United Nations Framework Convention on Climate Change.
- Legal obligations and commitments of developed and developing countries.
- Conference of the Parties (COP) decision-making processes.
- Nationally Determined Contributions (NDCs) and climate reporting obligations.
- Climate transparency, monitoring, verification, and compliance mechanisms.
- Case Study: Analysis of the UNFCCC framework and the evolution of international climate commitments through successive COP conferences.

Module 4: The Paris Agreement and Global Climate Commitments

- Legal structure, objectives, and implementation of the Paris Agreement.
- The global 1.5°C and 2°C temperature limitation goals.
- Nationally Determined Contributions and enhanced climate ambition.
- Global Stocktake and international progress assessment.
- Climate adaptation, mitigation, and transparency obligations.
- Case Study: Assessment of the Paris Agreement's implementation and the challenges of strengthening national climate commitments.

Module 5: Climate Change Mitigation, Adaptation and Resilience Law

- Legal frameworks for greenhouse gas emissions reduction.
- National climate adaptation strategies and resilience planning.
- Climate risk assessment and vulnerability management.
- Legal approaches to renewable energy and low-carbon development.
- Climate resilience obligations in infrastructure and public investment.
- Case Study: Bangladesh's climate adaptation and disaster resilience initiatives, focusing on legal and institutional approaches to climate vulnerability.

Module 6: State Responsibility and Transboundary Environmental Harm

- Principles of state responsibility under international law.
- Prevention of significant transboundary environmental damage.
- Environmental due diligence and cooperation obligations.
- International environmental liability and compensation mechanisms.

• Dispute resolution for cross-border environmental harm.

• Case Study: The Pulp Mills on the River Uruguay case – examining environmental impact assessment, transboundary consultation, and state obligations.

Module 7: International Biodiversity Law and Ecosystem Protection

• Convention on Biological Diversity and its implementation.

• Kunming-Montreal Global Biodiversity Framework.

• Legal protection of endangered species and critical habitats.

• International frameworks for marine and terrestrial biodiversity.

• Access and benefit-sharing of genetic resources.

• Case Study: Implementation of the Convention on Biological Diversity and the Kunming-Montreal Global Biodiversity Framework in national conservation strategies.

Module 8: International Environmental Human Rights and Climate Justice

• Relationship between environmental protection and human rights.

• The right to a clean, healthy, and sustainable environment.

• Climate justice and intergenerational equity.

• Indigenous peoples' environmental rights and participation.

• Human rights obligations in climate change responses.

• Case Study: The Urgenda Foundation v. State of the Netherlands case – exploring human rights-based climate litigation and state obligations.

Module 9: International Climate Litigation and Environmental Dispute Resolution

• Legal foundations of international climate litigation.

• Jurisdiction and admissibility of environmental claims.

• Litigation against governments and corporate environmental actors.

• Advisory opinions and international judicial mechanisms.

• Arbitration, mediation, and alternative environmental dispute resolution.

• Case Study: The International Court of Justice advisory opinion on the Obligations of States in Respect of Climate Change, focusing on state obligations and legal accountability.

Module 10: Carbon Markets, Emissions Trading and Carbon Pricing

• International legal frameworks for carbon markets.

• Article 6 of the Paris Agreement and cooperative approaches.

• Internationally Transferred Mitigation Outcomes (ITMOs).

• Emissions trading systems and carbon taxation.

• Carbon credit integrity, verification, and greenwashing prevention.

• Case Study: The European Union Emissions Trading System (EU ETS) – examining carbon pricing, emissions reduction incentives, and regulatory compliance.

Module 11: International Climate Finance and Loss and Damage Mechanisms

• Global climate finance architecture and funding institutions.

• Green Climate Fund and Global Environment Facility.

• Climate finance mobilization and international funding commitments.

• Loss and Damage Fund governance and implementation.

• Climate finance accountability, transparency, and access mechanisms.

• Case Study: The operationalization of the Fund for Responding to Loss and Damage, including challenges in funding climate-vulnerable developing countries.

Module 12: Environmental Impact Assessment and International Compliance

• International standards for Environmental Impact Assessment (EIA).

• Strategic Environmental Assessment (SEA) and sustainable planning.

• Environmental permitting and regulatory enforcement.

• Transboundary environmental assessment and public consultation.

• Environmental audits, compliance monitoring, and reporting.

• Case Study: The Espoo Convention – examining transboundary environmental impact assessment and international consultation obligations.

Module 13: Corporate Environmental Accountability, ESG and Sustainability Governance

• Corporate responsibilities under international environmental standards.

• Environmental, Social and Governance (ESG) regulatory frameworks.

• Corporate climate disclosures and sustainability reporting.

• Supply chain environmental due diligence and accountability.

• Greenwashing, corporate liability, and environmental risk management.

• Case Study: The Shell climate litigation proceedings in the Netherlands – examining corporate climate responsibilities and the evolving role of climate accountability.

Module 14: Emerging Global Environmental Challenges and Regulatory Developments

• International regulation of plastic pollution and marine waste.

• Ocean governance and protection of marine ecosystems.

• International environmental law and hazardous chemical management.

• Climate technology transfer and innovation governance.

• Artificial intelligence, environmental monitoring, and emerging regulatory challenges.

• Case Study: Negotiations towards a global plastics treaty – examining international cooperation, regulatory disagreements, and pollution control strategies.

Module 15: Global Climate Diplomacy, Negotiations and Future Governance

• International environmental negotiations and diplomatic strategies.

• Preparation for COP conferences and multilateral negotiations.

• Climate governance cooperation between developed and developing countries.

• Strengthening national climate policies and international commitments.

• Future directions in international environmental law and global sustainability governance.

• Case Study: COP28 and the UAE Consensus – evaluating the global stocktake, fossil fuel transition commitments, renewable energy targets, and international climate diplomacy.

Training Methodology

• Interactive lectures and presentations.

• Group discussions and brainstorming sessions.

• Hands-on exercises using real-world datasets.

• Role-playing and scenario-based simulations.

• Analysis of case studies to bridge theory and practice.

• Peer-to-peer learning and networking.

• Expert-led Q&A sessions.

• Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/international-environmental-law-and-global-climate-governance-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
