Course Curriculum & Modules

Transition Finance and Decarbonisation Investment Strategies Training Course

Introduction

Transition Finance and Decarbonisation Investment Strategies Training Course provides professionals with advanced knowledge and practical skills for mobilising capital towards low-carbon economic transformation. The course explores transition finance frameworks, climate-aligned investments, sustainable finance instruments, carbon markets, green bonds, climate risk assessment and environmental, social and governance (ESG) integration. Participants will examine how financial institutions, governments and corporations can develop credible decarbonisation pathways, evaluate climate-related investment opportunities and align financing decisions with the Paris Agreement, net-zero commitments and sustainable development objectives.

The training also focuses on innovative financing mechanisms, including blended finance, Public-Private Partnerships (PPP), sustainability-linked loans and transition bonds. Through international case studies, participants will understand how to assess carbon-intensive industries, measure emissions reduction potential, structure bankable climate projects and improve investment returns while achieving measurable environmental outcomes. Emphasis is placed on climate finance mobilisation, investment risk management, just transition principles, financial modelling and strategic capital allocation to accelerate industrial decarbonisation and long-term economic resilience.

Course Objectives

By the end of this course, participants will be able to:

- Understand transition finance principles and sustainable investment frameworks.
- Develop credible corporate decarbonisation strategies and net-zero pathways.
- Evaluate climate-aligned investment opportunities and financial returns.
- Apply ESG integration in investment decision-making.
- Assess climate-related financial risks and opportunities.
- Structure green bonds, transition bonds and sustainability-linked loans.
- Mobilise private capital for low-carbon infrastructure development.
- Apply blended finance and Public-Private Partnerships (PPP) models.
- Evaluate carbon pricing mechanisms and carbon market investments.
- Conduct climate scenario analysis and investment stress testing.
- Develop financial models for decarbonisation projects.
- Integrate just transition principles into investment strategies.
- Monitor climate impact, emissions reductions and investment performance.

Organizational Benefits

- Strengthens sustainable finance and climate investment capabilities.
- Improves capital allocation towards low-carbon projects.
- Enhances ESG performance and climate governance.
- Supports corporate net-zero and decarbonisation commitments.
- Reduces exposure to climate-related financial risks.
- Improves access to green and transition financing.
- Strengthens investor confidence and stakeholder relationships.
- Promotes regulatory compliance and climate disclosure.
- Identifies emerging climate investment opportunities.
- Supports long-term financial resilience and competitiveness.

Target Audiences

- Investment managers and portfolio analysts.
- Banking and financial services professionals.
- Corporate finance and treasury executives.

- ESG and sustainability managers.
- Climate finance and carbon market specialists.
- Government policymakers and regulators.
- Infrastructure and energy project developers.
- Development finance institutions and investment consultants.

Course Duration: 5 days

Course Modules

Module 1: Foundations of Transition Finance

- Principles, concepts and evolution of transition finance.
- Green finance versus transition finance frameworks.
- Paris Agreement and net-zero investment alignment.
- Transition finance eligibility and credibility criteria.
- Global case study: Japan's GX transition finance initiatives.
- International transition finance standards and market developments.

Module 2: Corporate Decarbonisation Strategies

- Developing corporate decarbonisation roadmaps.
- Scope 1, Scope 2 and Scope 3 emissions assessment.
- Science-based targets and net-zero commitments.
- Industrial energy efficiency and emissions reduction.
- Global case study: ArcelorMittal's steel decarbonisation investments.
- Monitoring corporate carbon reduction performance.

Module 3: Climate-Aligned Investment Strategies

- Identifying low-carbon investment opportunities.
- Climate-aligned portfolio construction and asset allocation.
- Evaluating renewable energy and clean technology investments.
- Climate investment returns and financial performance.
- Global case study: Denmark's offshore wind investment development.
- Integrating climate considerations into investment decisions.

Module 4: Sustainable Finance Instruments and Capital Mobilisation

- Green bonds, transition bonds and sustainability-linked loans.
- Blended finance and concessional financing mechanisms.
- Climate funds and institutional investment mobilisation.
- Structuring Public-Private Partnerships (PPP) for climate projects.
- Global case study: India's sovereign green bond programme.
- Evaluating sustainable finance instruments and investment risks.

Module 5: Climate Risk Assessment and Financial Modelling

- Physical and transition climate risk assessment.
- Climate scenario analysis and financial stress testing.
- Carbon pricing and emissions cost modelling.
- Discounted cash flow analysis for climate investments.
- Global case study: European Central Bank climate stress testing.
- Measuring climate investment returns and financial resilience.

Module 6: Carbon Markets and Climate Investment Opportunities

- Voluntary and compliance carbon markets.
- Carbon credits, offsets and emissions trading systems.
- Carbon pricing mechanisms and investment implications.
- Carbon project verification and integrity assessment.

- Global case study: EU Emissions Trading System.
- Evaluating carbon market investment opportunities.

Module 7: Just Transition and Regulatory Frameworks

- Social and economic dimensions of just transition.
- Climate finance regulations and disclosure requirements.
- International Sustainability Standards Board (ISSB) frameworks.
- Managing workforce and community impacts of decarbonisation.
- Global case study: South Africa's Just Energy Transition Partnership.
- Integrating social safeguards into transition investments.

Module 8: Transition Finance Implementation and Performance Measurement

- Developing institutional transition finance strategies.
- Establishing climate investment governance frameworks.
- Measuring emissions reduction and climate impact.
- Transition finance reporting and accountability.
- Global case study: European Investment Bank climate financing.
- Developing actionable transition investment implementation plans.

Training Methodology

- Interactive presentations and expert-led discussions.
- Practical exercises on climate investment assessment.
- Group activities involving decarbonisation strategy development.
- International case studies and comparative analysis.
- Financial modelling and investment appraisal simulations.
- Scenario-based learning and group presentations.
- Practical workshops on transition finance instruments.
- Knowledge assessments and implementation planning.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/transition-finance-and-decarbonisation-investment-strategies-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
