# Course Curriculum & Modules

**Agentic AI Regulation, Autonomous Systems and Legal Liability Training Course**

**Introduction**

**Agentic AI Regulation, Autonomous Systems and Legal Liability Training Course is designed to equip legal practitioners, regulators, policymakers, technology executives and compliance professionals with advanced knowledge and practical skills for navigating the rapidly evolving legal landscape of Agentic Artificial Intelligence (AI), autonomous systems, algorithmic decision-making and emerging digital technologies. As AI systems increasingly move beyond conventional automated tools to independently plan, execute tasks, make decisions and interact with digital and physical environments, new regulatory, ethical and legal challenges are emerging. Organisations must understand how existing legal frameworks apply to autonomous AI agents, who bears responsibility for AI-generated decisions, and how to manage risks associated with algorithmic bias, data protection, cybersecurity, transparency, explainability and human oversight. This course explores emerging AI governance frameworks, international AI regulations, autonomous technology legislation, digital accountability, AI safety standards and technology risk management, providing participants with the expertise to interpret regulatory obligations and develop effective legal safeguards for responsible AI deployment.**

**The programme further examines the complex relationship between AI autonomy, legal personality, civil liability, product liability, professional negligence, contractual responsibility and corporate accountability. Participants will explore liability allocation where autonomous systems cause financial loss, discrimination, property damage, personal injury or regulatory violations, including situations involving multiple developers, deployers, operators and third-party technology providers. Through practical case studies, regulatory simulations, legal analysis and scenario-based exercises, participants will develop strategies for drafting AI-related contracts, conducting algorithmic impact assessments, establishing AI audit mechanisms and implementing robust compliance programmes. Particular attention will be given to the EU AI Act, international AI governance principles, emerging AI legislation, autonomous vehicles, robotics, agentic AI applications and cross-border regulatory enforcement. By the end of the training, participants will be better positioned to advise organisations, manage AI-related legal exposure, strengthen institutional accountability and support innovation while ensuring that autonomous technologies operate within appropriate legal, ethical and regulatory boundaries.**

**Course Duration**

**10 days**

## Course Objectives

By the end of this training course, participants will be able to:

- Understand the legal foundations of Agentic AI, autonomous systems and intelligent automation.
- Interpret emerging international and national AI regulatory frameworks and compliance requirements.
- Analyse the legal implications of autonomous decision-making and AI agent autonomy.
- Evaluate civil, criminal, contractual and administrative liability arising from AI-related harm.
- Apply the EU AI Act and risk-based AI governance principles to organisational operations.
- Develop effective AI governance, accountability and regulatory compliance frameworks.
- Assess algorithmic bias, discrimination and fairness risks in autonomous systems.
- Understand data protection, privacy and cybersecurity obligations affecting AI agents.
- Determine liability allocation among AI developers, providers, deployers and operators.
- Evaluate legal challenges involving autonomous vehicles, robotics and industrial automation.
- Apply explainability, transparency and human oversight requirements to AI systems.
- Draft effective AI contracts, liability clauses and technology risk allocation provisions.
- Design AI audit, impact assessment and legal risk management strategies for responsible autonomous technology deployment.

Target Audience

- Lawyers, legal practitioners, advocates and corporate legal advisers.
- Judges, magistrates, judicial officers and legal researchers.
- Government regulators, policymakers and public-sector compliance officers.
- AI governance specialists, technology lawyers and digital transformation consultants.
- Corporate executives, directors and senior organisational decision-makers.
- Risk management, compliance, internal audit and corporate governance professionals.
- Data protection officers, cybersecurity specialists and information technology managers.
- AI developers, robotics engineers, autonomous systems designers and technology entrepreneurs.

Course Modules

## Module 1: Foundations of Agentic AI and Autonomous Systems

- Understanding artificial intelligence, machine learning and deep learning technologies.

- Evolution from traditional AI tools to autonomous and agentic AI systems.
- Architecture and operational characteristics of intelligent AI agents.
- Autonomous planning, reasoning, execution and decision-making capabilities.
- Legal and regulatory implications of increasing AI autonomy.
- Case Study: Examination of an autonomous AI agent deployed in a financial institution to approve transactions and execute customer service decisions without continuous human intervention.

### Module 2: International AI Regulation and Emerging Legal Frameworks

- Overview of global AI regulatory developments and legislative approaches.
- Understanding the EU AI Act and its risk-based regulatory structure.
- OECD AI Principles and UNESCO Recommendation on the Ethics of AI.
- Comparative analysis of AI governance approaches in the United States, United Kingdom, European Union and other jurisdictions.
- Cross-border regulatory cooperation and international AI compliance.
- Case Study: A multinational technology company deploys the same generative and agentic AI platform across several jurisdictions.

### Module 3: Legal Status and Accountability of Autonomous AI Agents

- Legal personality and the legal status of autonomous systems.
- Distinguishing AI agency from legal agency under established legal principles.
- Legal attribution of decisions made by autonomous AI agents.
- Corporate responsibility for AI-generated actions and decisions.
- Accountability gaps arising from autonomous and self-learning technologies.
- Case Study: An autonomous procurement agent enters into commercial transactions exceeding its assigned spending limits.

### Module 4: Civil Liability and Compensation for AI-Related Harm

- Foundations of civil liability in autonomous technology environments.
- Negligence, duty of care and breach of legal obligations.
- Causation, foreseeability and evidentiary challenges in AI-related harm.
- Compensation for financial loss, personal injury and property damage.
- Liability allocation between developers, providers, operators and users.
- Case Study: An autonomous industrial robot causes injury after incorrectly interpreting operational instructions.

### Module 5: Product Liability and Defective AI Systems

- Product liability principles applicable to AI-enabled products.
- Identifying software defects and design failures in autonomous systems.
- Liability for defective algorithms, training data and system updates.
- Manufacturer, software developer and distributor responsibilities.
- Emerging product safety obligations for AI-powered products.
- Case Study: An AI-powered medical monitoring device generates incorrect alerts because of a software defect.

### Module 6: Contractual Liability and AI Technology Agreements

- Drafting contracts for agentic AI development and deployment.
- Service-level agreements and AI performance guarantees.
- Warranties, indemnities and limitations of liability.
- Allocation of risks between AI vendors, customers and third-party providers.
- Dispute resolution and contractual remedies for AI failures.
- Case Study: A company enters into an agreement with an AI vendor whose autonomous system causes substantial operational losses.

### Module 7: Algorithmic Bias, Discrimination and Fundamental Rights

- Understanding algorithmic discrimination and automated decision-making.
- Identifying bias in AI training data and decision models.
- Equality, non-discrimination and fundamental human rights protections.
- Legal remedies for individuals affected by automated decisions.
- Fairness testing, algorithmic audits and responsible AI development.
- Case Study: An AI-powered recruitment platform systematically rejects qualified candidates from certain demographic groups.

### Module 8: Data Protection, Privacy and Cybersecurity in Agentic AI

- Data protection obligations in autonomous AI environments.
- Lawful processing, consent and purpose limitation.
- Personal data exposure through autonomous AI agents.
- Cybersecurity threats, prompt injection and unauthorised agent access.
- Data governance, retention, security controls and breach notification.
- Case Study: An autonomous AI assistant unintentionally accesses confidential employee records and transmits sensitive information to an external platform.

### Module 9: Human Oversight, Transparency and Explainability

- Legal requirements for meaningful human oversight.
- Explainable AI and transparency in automated decision-making.
- Human intervention, escalation and override mechanisms.
- Documentation and traceability of AI-generated decisions.
- Accountability frameworks for human-AI collaboration.
- Case Study: A government agency uses an autonomous AI system to determine eligibility for public benefits.

### Module 10: Autonomous Vehicles, Robotics and Physical AI Liability

- Legal frameworks governing autonomous vehicles and mobility systems.
- Liability arising from self-driving vehicle accidents.
- Robotics safety, operational risks and legal compliance.
- Autonomous drones, unmanned systems and aviation regulations.
- Insurance, compensation and responsibility for physical AI-related damage.
- Case Study: An autonomous delivery vehicle causes a road accident after failing to recognise a pedestrian.

### Module 11: Agentic AI in Financial Services and Commercial Transactions

- Autonomous AI agents in banking, fintech and financial services.
- Algorithmic trading and automated investment decisions.
- AI-powered lending, credit assessment and fraud detection.
- Consumer protection and financial regulatory obligations.
- Legal responsibility for unauthorised autonomous transactions.
- Case Study: An AI trading agent independently executes a series of high-risk transactions, resulting in significant financial losses.

### Module 12: Intellectual Property, Ownership and AI-Generated Outputs

- Copyright protection for AI-generated works and content.
- Ownership of AI-generated inventions and creative outputs.
- Patent law and autonomous AI-assisted innovation.
- Training data, licensing and intellectual property infringement.
- Trade secrets, proprietary algorithms and commercial confidentiality.
- Case Study: An autonomous AI research agent generates a potentially patentable technical invention using licensed third-party datasets.

### Module 13: AI Governance, Risk Management and Regulatory Compliance

- Developing enterprise-wide AI governance frameworks.
- AI risk classification and regulatory impact assessments.
- Establishing internal AI policies and accountability structures.
- AI management systems, audit trails and compliance monitoring.
- Regulatory reporting, incident management and enforcement readiness.
- Case Study: A multinational organisation introduces autonomous AI agents across procurement, finance and human resources without a central governance framework.

### Module 14: Criminal Liability, Cybercrime and Autonomous AI Misuse

- Criminal law considerations involving autonomous AI systems.
- Attribution of criminal intent and responsibility in AI-assisted offences.

- AI-enabled fraud, impersonation and financial cybercrime.
- Malicious autonomous agents and automated cyberattacks.
- Criminal investigations, digital evidence and forensic accountability.
- Case Study: A malicious autonomous AI agent is used to conduct fraudulent financial transactions and manipulate digital identities.

### Module 15: Future of AI Law, Regulatory Enforcement and Emerging Legal Challenges

- Emerging legislation and future directions in agentic AI regulation.
- Legal implications of artificial general intelligence and advanced autonomy.
- Regulatory sandboxes and innovation-friendly AI governance.
- International enforcement cooperation and cross-border disputes.
- Developing future-ready legal strategies for autonomous technology.
- Case Study: A technology company introduces an advanced autonomous AI platform capable of independently negotiating contracts, managing business operations and making strategic decisions

Training Methodology

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

### Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
