Datastat Research
Building Capacity in Training and Research

DATASTAT TRAINING IN

OFFICIAL COURSE PROSPECTUS

Center for Advanced Research & Professional Development

Nairobi Training Center • Global Virtual Academy • Corporate On-Site

AVIATION AND AIRPORT MANAGEMENT

Airport Predictive Analytics Training Course

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

PROGRAM SPECIFICATIONS & HIGHLIGHTS

- **DURATION**
  5 Days Practical Hands-on
- **DELIVERY MODES**
  In-Person Class & Live Virtual
- **CERTIFICATION**
  Accredited Certificate of Completion
- **INTAKES / DATES**
  Multiple Cohort Schedules Included

PREPARED FOR:

Valued Participant

Email: training@datastatresearch.org | Issued: November 21, 2026

Academic & Professional Training Year: 2026

DATASTAT TRAINING INSTITUTE

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Email: training@datastatresearch.org

Airport Predictive Analytics Training Course

Aviation and Airport Management • 5 Days Intensive • Accredited Certification

Course Overview

Airport Predictive Analytics Training Course is designed to equip aviation professionals with advanced knowledge and practical skills in predictive analytics, artificial intelligence (AI), machine learning, big data analytics, and data-driven airport management.

Key Skills & Software Tools Covered

MS Word • IBM SPSS Modeler • Microsoft Power BI • and Tableau

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
27 Jul 2026 – 31 Jul 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Cape Town	Classroom / 5d	**$4,500 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Addis Ababa	Classroom / 5d	**$3,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Singapore	Classroom / 5d	**$5,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Istanbul	Classroom / 5d	**$5,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Bangkok	Classroom / 5d	**$5,000 USD / KES 110,000**
27 Jul 2026 – 31 Jul 2026	Accra	Classroom / 5d	**$4,000 USD / KES 110,000**
3 Aug 2026 – 7 Aug 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
3 Aug 2026 – 7 Aug 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 110,000**
3 Aug 2026 – 7 Aug 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 110,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Airport Predictive Analytics Training Course

Introduction

Airport Predictive Analytics Training Course is designed to equip aviation professionals with advanced knowledge and practical skills in predictive analytics, artificial intelligence (AI), machine learning, big data analytics, and data-driven airport management. Modern airports are transforming into intelligent ecosystems where predictive technologies support operational efficiency, passenger experience enhancement, safety improvement, resource optimization, and strategic decision-making. This course explores how predictive analytics models can forecast aircraft movements, passenger flows, maintenance requirements, security risks, and operational disruptions.

Through global aviation case studies and practical applications, participants will learn how to leverage predictive analytics platforms, real-time airport data, business intelligence tools, and advanced forecasting techniques to improve airport performance. The course focuses on developing data-driven leadership capabilities, predictive modeling skills, and innovative approaches required for smart airport development, digital transformation, and future-ready aviation operations.

Course Objectives

By the end of this course, participants will be able to:

- Understand the principles of predictive analytics and its applications in modern airport operations.

- Develop skills in artificial intelligence, machine learning, and aviation data analytics.
- Apply predictive models for airport capacity planning and operational forecasting.
- Analyze passenger behavior using big data and predictive intelligence techniques.
- Improve airport safety management through predictive risk analytics.
- Utilize predictive maintenance strategies for airport assets and infrastructure.
- Implement data-driven decision-making frameworks for airport leadership.
- Evaluate airport performance using advanced analytics dashboards and KPIs.
- Apply forecasting techniques for traffic management and resource allocation.
- Understand digital transformation strategies within smart airport ecosystems.
- Develop predictive solutions for reducing operational delays and disruptions.
- Enhance customer experience through predictive passenger analytics.
- Integrate emerging technologies such as AI, IoT, and cloud analytics into airport management.

Organizational Benefits

- Improved airport operational efficiency through predictive decision-making.
- Reduced delays through advanced forecasting and disruption management.
- Enhanced passenger experience through personalized services.
- Improved asset reliability through predictive maintenance programs.
- Better resource allocation using real-time operational intelligence.
- Strengthened safety and security through predictive risk analysis.
- Increased revenue opportunities through data-driven strategies.
- Improved workforce planning and operational coordination.
- Faster response to airport emergencies and disruptions.
- Development of future-ready smart airport capabilities.

Target Audiences

- Airport executives and senior aviation managers.
- Airport operations and terminal managers.
- Airline operations and ground handling professionals.
- Aviation data analysts and business intelligence specialists.
- Airport safety and security managers.
- Airport engineering and maintenance professionals.
- Aviation technology and digital transformation teams.
- Government aviation regulators and airport authorities.

Course Duration: 5 days

Course Modules

Module 1: Fundamentals of Airport Predictive Analytics

- Introduction to predictive analytics concepts within airport environments.
- Understanding AI, machine learning, and aviation data ecosystems.
- Exploring airport data sources including operational, passenger, and infrastructure data.
- Developing predictive analytics strategies for airport performance improvement.
- Global case study: Singapore Changi Airport smart analytics implementation.
- Practical exercise on identifying airport predictive analytics opportunities.

Module 2: Airport Data Management and Analytics Frameworks

- Understanding airport data collection, integration, and governance systems.
- Applying big data technologies for aviation decision-making.
- Developing data quality management and analytics frameworks.
- Using dashboards and visualization tools for airport intelligence.
- Global case study: Heathrow Airport data-driven operational management.
- Practical activity on designing an airport analytics framework.

Module 3: Artificial Intelligence and Machine Learning Applications

- Understanding AI algorithms used in airport operational forecasting.
- Applying machine learning models for airport performance prediction.
- Exploring automation opportunities through intelligent systems.
- Developing predictive models for operational optimization.
- Global case study: Amsterdam Schiphol Airport AI applications.
- Practical demonstration of machine learning analytics techniques.

Module 4: Predictive Passenger Analytics and Experience Management

- Analyzing passenger behavior using predictive analytics models.
- Forecasting passenger demand and terminal congestion patterns.
- Improving customer experience through personalized solutions.
- Applying analytics for queue management and passenger flow optimization.
- Global case study: Dubai International Airport passenger analytics systems.
- Workshop on developing passenger prediction strategies.

Module 5: Predictive Maintenance and Asset Management

- Understanding predictive maintenance concepts for airport infrastructure.
- Using IoT sensors and analytics for equipment monitoring.
- Predicting failures of airport systems and critical assets.
- Improving maintenance planning through condition-based analytics.
- Global case study: Hong Kong International Airport predictive maintenance program.
- Practical exercise on developing maintenance prediction models.

Module 6: Predictive Safety, Security, and Risk Analytics

- Applying analytics to identify aviation safety risks.
- Using predictive intelligence for security threat prevention.
- Developing risk assessment models for airport operations.
- Integrating safety data into predictive decision systems.
- Global case study: European airport safety analytics initiatives.
- Scenario-based exercise on predictive risk management.

Module 7: Airport Operations Forecasting and Optimization

- Forecasting aircraft movements and airport capacity requirements.
- Applying predictive analytics for resource allocation.
- Improving runway, gate, and baggage management operations.
- Reducing delays through predictive disruption analysis.
- Global case study: Atlanta International Airport operational analytics.
- Practical workshop on airport optimization strategies.

Module 8: Future Trends in Airport Predictive Analytics

- Exploring future developments in AI-powered aviation systems.
- Understanding cloud analytics, IoT, and digital twin technologies.
- Developing strategies for smart airport transformation.
- Building organizational readiness for predictive analytics adoption.
- Global case study: Helsinki Airport digital innovation projects.
- Final project presentation on predictive airport solutions.

Training Methodology

- Instructor-led presentations covering predictive analytics concepts and aviation applications.
- Interactive discussions focusing on real-world airport challenges.
- Global aviation case studies from leading international airports.
- Practical exercises using predictive analytics scenarios.
- Group activities focused on airport data-driven decision-making.
- Demonstrations of AI, machine learning, and analytics tools.

- Problem-solving sessions based on operational airport situations.
- Final project development and participant presentations.

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/airport-predictive-analytics-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
