Automated Data Collection Pipelines in M&E Training Course

Introduction

Automated Data Collection Pipelines in M&E Training Course is a cutting-edge training course designed to equip professionals with the skills to build, manage, and optimize real-time, scalable, and reliable data flows for evidence-based decision-making. As development programs increasingly adopt digital M&E systems, cloud platforms, APIs, mobile data collection tools, and data warehouses, automation has become essential for improving data quality, timeliness, accuracy, and accountability across projects and portfolios.

This course bridges traditional M&E frameworks with modern data engineering concepts, enabling participants to design end-to-end automated pipelines from data capture and validation to integration, analysis, and reporting dashboards. Through hands-on case studies from humanitarian, health, governance, and climate programs, learners will gain practical expertise in low-code and no-code automation, interoperability standards, data governance, and adaptive learning systems aligned with donor and institutional requirements.
