Building Capacity in Training and Research

DATASTAT TRAINING IN

OFFICIAL COURSE PROSPECTUS

Center for Advanced Research & Professional Development

Nairobi Training Center • Global Virtual Academy • Corporate On-Site

COMMUNITY DEVELOPMENT

Big Data for Development Training Course

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

PROGRAM SPECIFICATIONS & HIGHLIGHTS

DURATION
10 Days Practical Hands-on

DELIVERY MODES
In-Person Class & Live Virtual

CERTIFICATION
Accredited Certificate of Completion

INTAKES / DATES
Multiple Cohort Schedules Included

PREPARED FOR:

Valued Participant

Email: training@datastatresearch.org | Issued: November 21, 2026

Academic & Professional Training Year: 2026

DATASTAT TRAINING INSTITUTE

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Big Data for Development Training Course

Community Development • 10 Days Intensive • Accredited Certification

Course Overview

Big Data for Development Training Course is designed to equip professionals, analysts, and decision-makers with the essential skills and knowledge required to leverage big data for socio-economic development, policy-making, and strategic planning.

Key Skills & Software Tools Covered

MS Word • Apache Hadoop • Tableau • and Apache Spark

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
16 Mar 2026 – 27 Mar 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Cape Town	Classroom / 10d	**$9,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Addis Ababa	Classroom / 10d	**$6,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Singapore	Classroom / 10d	**$10,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Istanbul	Classroom / 10d	**$10,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Bangkok	Classroom / 10d	**$10,000 USD / KES 220,000**
16 Mar 2026 – 27 Mar 2026	Accra	Classroom / 10d	**$8,000 USD / KES 220,000**
30 Mar 2026 – 10 Apr 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
30 Mar 2026 – 10 Apr 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 220,000**
30 Mar 2026 – 10 Apr 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 220,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Big Data for Development Training Course

Introduction

Big Data for Development Training Course is designed to equip professionals, analysts, and decision-makers with the essential skills and knowledge required to leverage big data for socio-economic development, policy-making, and strategic planning. This course emphasizes the practical application of big data analytics in addressing developmental challenges, enhancing operational efficiency, and driving evidence-based decision-making across public, private, and non-profit sectors. Participants will gain hands-on experience with cutting-edge tools, frameworks, and techniques to extract actionable insights from large and complex datasets. Through real-world case studies, participants will understand how data-driven strategies can transform governance, healthcare, education, and infrastructure planning, fostering sustainable development outcomes.

In today's era of digital transformation, the ability to analyze, interpret, and utilize big data has become a critical competency for organizations and professionals alike. This course covers emerging trends, best practices, and innovative approaches in big data management, ensuring participants can address pressing development challenges with agility and efficiency. By the end of the training, participants will be proficient in data integration, visualization, predictive modeling, and data-driven policy development, enhancing both individual capacity and organizational impact. The course also highlights ethical considerations, data privacy, and governance standards essential for responsible data use in development contexts.

Course Objectives

By the end of this course, participants will be able to:

- Understand the fundamentals of big data and its relevance to development initiatives.
- Apply advanced analytics techniques for development data interpretation.
- Utilize big data tools for data collection, cleaning, and preprocessing.
- Integrate diverse datasets for holistic decision-making.
- Conduct predictive modeling and scenario analysis for developmental outcomes.
- Visualize complex data for enhanced communication and policy influence.
- Employ geographic information systems (GIS) in development planning.
- Ensure data quality, integrity, and governance in analytics projects.
- Implement ethical and responsible data practices in development programs.
- Leverage machine learning and AI for predictive insights in development.
- Evaluate the impact of data-driven interventions using statistical methods.
- Formulate data-driven strategies for resource allocation and policy-making.
- Analyze real-world development case studies to identify best practices.

Organizational Benefits

- Improved decision-making with evidence-based insights.
- Enhanced operational efficiency and resource optimization.
- Strengthened data governance and compliance with standards.
- Increased capacity for predictive analytics and planning.
- Improved stakeholder engagement through data visualization.
- Enhanced project evaluation and monitoring capabilities.
- Support for sustainable development initiatives.
- Ability to identify trends and risks proactively.
- Streamlined data integration across departments.
- Competitive advantage through innovation and analytics adoption.

Target Audiences

- Government policymakers and development planners
- Data analysts and data scientists in development sectors
- NGO and non-profit program managers
- Public health professionals
- Urban and infrastructure planners
- Social researchers and statisticians
- IT and business intelligence professionals
- Academic researchers and postgraduate students

Course Duration: 10 days

Course Modules

Module 1: Introduction to Big Data for Development

- Overview of big data concepts and frameworks
- Role of big data in socio-economic development
- Challenges and opportunities in development data
- Big data ecosystem and infrastructure
- Case study: Big data impact in public health
- Hands-on exercise: Exploring open development datasets

Module 2: Data Collection and Preprocessing

- Sources of development data
- Data quality assessment techniques
- Cleaning and transforming raw data

- Data integration strategies
- Case study: Multi-source education data integration
- Practical session: Preprocessing development datasets

Module 3: Data Storage and Management

- Big data storage architectures
- Cloud computing and distributed storage
- Database management for development datasets
- Metadata and data cataloging
- Case study: Smart city data storage solutions
- Hands-on lab: Setting up cloud storage for development data

Module 4: Data Analytics Techniques

- Descriptive, diagnostic, predictive, and prescriptive analytics
- Statistical modeling for development outcomes
- Data mining approaches
- Machine learning applications
- Case study: Predictive analytics in disaster response
- Practical session: Applying analytics on health datasets

Module 5: Geographic Information Systems (GIS)

- GIS fundamentals for development planning
- Spatial data collection and analysis
- Mapping and visualization techniques
- GIS-based predictive modeling
- Case study: GIS in urban infrastructure development
- Hands-on exercise: Creating GIS maps for development projects

Module 6: Data Visualization and Communication

- Principles of effective data visualization
- Interactive dashboards and reporting tools
- Data storytelling for policy influence
- Visualizing complex development data
- Case study: Visualizing agricultural trends for farmers
- Practical session: Developing dashboards with Tableau or Power BI

Module 7: Predictive Modeling and Machine Learning

- Supervised and unsupervised learning techniques
- Regression, classification, and clustering models
- Evaluating model performance
- Application of machine learning in development programs
- Case study: Predicting school dropout rates using AI
- Hands-on exercise: Building predictive models

Module 8: Big Data Governance and Ethics

- Principles of data governance
- Ethical considerations in development data
- Data privacy and protection policies
- Regulatory compliance standards
- Case study: Ethical challenges in public health data use
- Practical session: Designing data governance policies

Module 9: Data-Driven Policy and Decision Making

- Using data for evidence-based policymaking

- Performance measurement and monitoring
- Data-informed resource allocation
- Stakeholder engagement using analytics
- Case study: Data-driven policies for urban development
- Workshop: Formulating a data-driven policy plan

Module 10: Social Impact Analytics

- Measuring impact of development initiatives
- Key performance indicators and metrics
- Social return on investment (SROI) analysis
- Reporting and evaluation frameworks
- Case study: Evaluating community development programs
- Hands-on session: Conducting impact assessment

Module 11: AI and Emerging Technologies in Development

- Role of AI in development solutions
- Internet of Things (IoT) for data collection
- Blockchain and transparency in development data
- Emerging big data technologies
- Case study: AI in agriculture and food security
- Practical session: Applying IoT data in analytics

Module 12: Project Management for Big Data Initiatives

- Planning and managing big data projects
- Risk management and mitigation
- Budgeting and resource allocation
- Team collaboration tools and techniques
- Case study: Managing a national health data project
- Workshop: Developing a big data project plan

Module 13: Data Analytics for Healthcare Development

- Health data sources and standards
- Predictive analytics in healthcare
- Public health surveillance using big data
- Data-driven healthcare decision-making
- Case study: COVID-19 response analytics
- Hands-on lab: Analyzing health datasets

Module 14: Education and Social Development Analytics

- Analyzing education performance data
- Identifying disparities using big data
- Early warning systems for social programs
- Dashboard development for social metrics
- Case study: Education access and performance evaluation
- Practical session: Developing social impact dashboards

Module 15: Capstone Project and Case Study Integration

- Integrating learning across modules
- Designing a development-focused analytics project
- Presenting insights and recommendations
- Peer review and collaborative analysis
- Case study: Comprehensive national development project
- Workshop: Final project presentation

Training Methodology

- Interactive lectures and presentations
- Hands-on exercises and labs using real datasets
- Group discussions and peer learning
- Case study analysis and presentations
- Workshops on data-driven decision-making
- Capstone project for practical application

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/big-data-for-development-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
