Course Curriculum & Modules

Climate Finance Regulation and Green Investment Governance Training Course

Introduction

Climate Finance Regulation and Green Investment Governance Training Course is designed to equip professionals with advanced knowledge and practical skills in climate finance policy, sustainable investment regulation, green financial markets, and environmental governance. As governments, financial institutions, development partners, and private investors accelerate the transition towards low-carbon and climate-resilient economies, understanding the regulatory frameworks governing climate finance has become increasingly important. This comprehensive training explores emerging trends in climate finance regulation, sustainable finance taxonomy, green investment frameworks, ESG (Environmental, Social and Governance) compliance, climate risk disclosure, carbon markets, green bonds, and sustainable investment governance. Participants will examine international climate agreements, national climate policies, financial regulations, and institutional mechanisms that mobilize capital for climate mitigation, adaptation, and resilience initiatives.

The course also focuses on strengthening institutional capacity to design, regulate, finance, and monitor environmentally sustainable investments while ensuring transparency, accountability, and financial integrity. Participants will gain practical insights into climate-related financial risk management, blended climate finance, impact investing, green banking, transition finance, climate investment funds, public-private partnerships, and sustainable capital allocation. Through real-world case studies, regulatory simulations, interactive discussions, and practical exercises, participants will learn how to evaluate green investment opportunities, address greenwashing risks, implement climate finance safeguards, and establish effective governance structures. The programme is particularly relevant for professionals working in financial regulation, banking, investment management, government institutions, development finance, environmental policy, and corporate sustainability who seek to advance climate-aligned investment strategies and support the global transition to a sustainable, inclusive, and climate-resilient economy.

Course Duration

5 days

Course Objectives

By the end of this training course, participants will be able to:

- Understand international and national climate finance regulatory frameworks, policies, and institutional governance structures.
- Interpret the implications of the Paris Agreement, UNFCCC frameworks, and climate commitments for financial institutions and investors.
- Develop expertise in green finance regulation, sustainable finance taxonomies, and climate investment standards.
- Evaluate climate-related financial risks using climate risk assessment, scenario analysis, and stress-testing methodologies.
- Understand the regulatory requirements governing green bonds, sustainability-linked bonds, and climate investment funds.
- Apply ESG integration, responsible investment principles, and sustainability disclosure frameworks.
- Identify and mitigate greenwashing, climate-related financial misconduct, and investment governance risks.
- Strengthen knowledge of blended finance, concessional finance, and innovative climate capital mobilization mechanisms.
- Evaluate investment opportunities in renewable energy, climate adaptation, and low-carbon infrastructure.
- Implement effective climate investment monitoring, reporting, verification, and impact measurement systems.
- Understand the governance and regulatory requirements of carbon markets and carbon credit investments.
- Develop strategies for strengthening public-private partnerships and sustainable development finance.
- Design effective climate finance governance strategies that promote transparency, accountability, financial resilience, and long-term environmental sustainability.

Target Audience

- Central bank officials, financial regulators, and banking supervisory authorities.
- Climate finance specialists, sustainable finance officers, and ESG professionals.
- Investment managers, portfolio managers, and institutional investors.
- Government policymakers, regulators, and public finance administrators.
- Development finance institution professionals and multilateral funding specialists.
- Corporate sustainability managers, environmental compliance officers, and ESG consultants.
- Banking executives, risk management professionals, and financial analysts.
- Environmental lawyers, climate policy advisors, researchers, and international development practitioners.

Course Modules

Module 1: Foundations of Climate Finance and Global Regulatory Frameworks

- Introduction to climate finance concepts, principles, and institutional structures.
- Evolution of international climate finance and sustainable investment governance.
- Understanding the UNFCCC, Kyoto Protocol, and Paris Agreement.
- Nationally Determined Contributions (NDCs) and climate investment priorities.
- Roles of governments, financial institutions, and international climate funds.
- Case Study: Examining the implementation of the Paris Agreement and climate finance commitments in developing economies, focusing on institutional coordination, investment mobilization, and climate accountability.

Module 2: Climate Finance Regulation and Sustainable Finance Taxonomies

- Principles and objectives of sustainable finance regulation.
- Development and implementation of national and regional green taxonomies.
- Regulatory standards for climate-aligned financial products.
- Sustainable finance disclosure and reporting requirements.
- Regulatory convergence, cross-border compliance, and international standards.
- Case Study: Comparing the EU Taxonomy for Sustainable Activities with emerging sustainable finance classification frameworks in African markets and assessing their implications for investment decisions.

Module 3: Green Investment Governance and ESG Integration

- Principles of green investment governance and institutional accountability.
- Environmental, Social and Governance (ESG) integration in investment decisions.
- Responsible investment principles and stewardship frameworks.
- Board oversight and sustainability governance responsibilities.

• ESG due diligence, compliance monitoring, and performance evaluation.

• Case Study: Assessing how an institutional investment fund integrates ESG criteria into its portfolio allocation, governance policies, and environmental performance monitoring.

Module 4: Climate Risk Management and Financial Stability

• Understanding physical climate risks and transition risks.

• Climate-related financial risk identification and assessment.

• Climate scenario analysis and financial stress testing.

• Integrating climate risks into enterprise risk management frameworks.

• Climate risk disclosure and financial stability supervision.

• Case Study: Evaluating the financial exposure of a commercial bank to climate-related risks associated with lending to carbon-intensive industries and climate-vulnerable businesses.

Module 5: Green Bonds, Sustainable Financial Instruments and Capital Markets

• Regulatory frameworks governing green bond issuance.

• Sustainability-linked bonds and transition finance instruments.

• Green loans, climate investment funds, and sustainable debt instruments.

• Green bond principles, use-of-proceeds requirements, and verification.

• Investor protection, transparency, and greenwashing prevention.

• Case Study: Reviewing a green bond issuance for renewable energy infrastructure, including project selection, regulatory compliance, investor reporting, and environmental impact verification.

Module 6: Climate Investment Mobilization and Innovative Financing Mechanisms

• Public and private climate finance mobilization strategies.

• Blended finance structures and concessional financing mechanisms.

• Public-private partnerships in climate infrastructure development.

• Climate investment funds and multilateral development financing.

• Innovative financing instruments for adaptation and mitigation projects.

• Case Study: Examining how blended finance can mobilize private sector investment in solar energy infrastructure in an emerging economy through development finance guarantees and concessional capital.

Module 7: Carbon Markets Regulation and Climate Investment Integrity

• Regulatory foundations of compliance and voluntary carbon markets.

• Carbon credit certification, verification, and trading mechanisms.

• Article 6 of the Paris Agreement and international carbon cooperation.

• Carbon accounting, emissions measurement, and reporting.

• Carbon market integrity, transparency, and greenwashing prevention.

• Case Study: Assessing a carbon credit investment project involving forest conservation, focusing on additionality, permanence, leakage, verification, and regulatory compliance.

Module 8: Climate Finance Monitoring, Reporting and Governance Implementation

• Climate finance performance measurement and impact assessment.

• Monitoring, Reporting and Verification (MRV) systems.

• Climate investment transparency and accountability mechanisms.

• Regulatory audits and sustainable investment compliance reviews.

• Developing institutional climate finance governance strategies.

• Case Study: Designing a climate finance monitoring framework for a national green investment programme, including project selection criteria, financial accountability, environmental indicators, and impact reporting.

Training Methodology

• Interactive lectures and presentations.

• Group discussions and brainstorming sessions.

• Hands-on exercises using real-world datasets.

• Role-playing and scenario-based simulations.

• Analysis of case studies to bridge theory and practice.

- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.
