Design for Six Sigma Training Course

Quality Assurance and ISO standards • 5 Days Intensive • Accredited Certification

Course Overview

Design for Six Sigma (DFSS) Training Course is a powerful methodology that combines innovation, structured design, and advanced problem-solving to develop products, services, and processes that meet customer expectations and achieve high performance.

Key Skills & Software Tools Covered

DFSS methodology • process design • quality optimization

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
29 Dec 2025 – 2 Jan 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
29 Dec 2025 – 2 Jan 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Cape Town	Classroom / 5d	**$4,500 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Addis Ababa	Classroom / 5d	**$3,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Singapore	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Istanbul	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Bangkok	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Accra	Classroom / 5d	**$4,000 USD / KES 90,000**
5 Jan 2026 – 9 Jan 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
5 Jan 2026 – 9 Jan 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
5 Jan 2026 – 9 Jan 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Design for Six Sigma Training Course

Introduction

Design for Six Sigma (DFSS) Training Course is a powerful methodology that combines innovation, structured design, and advanced problem-solving to develop products, services, and processes that meet customer expectations and achieve high performance. With the growing need for quality excellence, this training course provides in-depth knowledge of Six Sigma design principles, data-driven decision-making, and value-driven solutions that create a competitive advantage. Participants will gain critical insights into applying DFSS tools and frameworks to improve efficiency, minimize risks, and ensure customer satisfaction.

This course has been developed with strong emphasis on trending quality management concepts, digital transformation in process improvement, customer-centric strategies, and sustainable business growth. Through real-world case studies, interactive discussions, and practical simulations, learners will acquire the skills to transform organizational performance. The course is designed to empower professionals to lead with innovation, embrace analytics, and strategically align design initiatives with business goals.

Course Objectives

- Understand the fundamentals of Design for Six Sigma and its role in continuous improvement.
- Apply DMAIC and DMADV frameworks to product and process development.

- Enhance decision-making with advanced data analytics and predictive modeling.
- Integrate customer voice (VOC) into design and innovation strategies.
- Implement robust design and risk management methodologies.
- Leverage Lean Six Sigma and DFSS for digital transformation.
- Optimize business processes for efficiency and sustainability.
- Develop innovative solutions that drive customer satisfaction.
- Apply statistical tools and simulation models for process validation.
- Design cost-effective and scalable business solutions.
- Build leadership capabilities to drive Six Sigma initiatives.
- Use project management techniques for DFSS project execution.
- Align DFSS strategies with long-term organizational goals.

Organizational Benefits

- Improved customer satisfaction and loyalty.
- Enhanced operational efficiency and reduced waste.
- Higher product and service quality.
- Increased profitability and revenue growth.
- Stronger innovation and market competitiveness.
- Better risk management and process reliability.
- Improved cross-functional collaboration.
- Sustainable performance and cost reduction.
- Strengthened data-driven decision-making culture.
- Alignment of business processes with strategic goals.

Target Audiences

- Quality Managers
- Process Improvement Leaders
- Project Managers
- Product Development Teams
- Operations Managers
- Engineers and Analysts
- Business Transformation Specialists
- Senior Executives and Decision Makers

Course Duration: 5 days

Course Modules

Module 1: Introduction to Design for Six Sigma

- Overview of Six Sigma and DFSS principles
- Key differences between DMAIC and DMADV
- Evolution of DFSS in modern industries
- Importance of customer-centric design
- Practical applications of DFSS
- Case Study: DFSS implementation in a manufacturing organization

Module 2: Voice of the Customer (VOC) Integration

- Collecting and analyzing customer feedback
- Converting VOC into Critical to Quality (CTQ) requirements
- Customer journey mapping techniques
- Prioritizing customer needs for design
- Linking VOC to innovation strategies
- Case Study: Using VOC for product design in healthcare

Module 3: DFSS Frameworks “Çô DMADV and IDOV

- Step-by-step DMADV methodology
- Understanding IDOV (Identify, Design, Optimize, Validate)
- Application in service and product industries
- Integrating frameworks with business strategy
- Choosing the right approach for different projects
- Case Study: DMADV in a service industry project

Module 4: Advanced Data Analytics for DFSS

- Role of statistics in DFSS projects
- Predictive analytics in design decision-making
- Use of simulation and modeling techniques
- Data-driven root cause analysis
- Software tools supporting DFSS analytics
- Case Study: Applying data analytics for process improvement

Module 5: Design Innovation and Creativity Tools

- Brainstorming and idea generation techniques
- TRIZ methodology for problem-solving
- Design thinking in Six Sigma projects
- Rapid prototyping and iterative design
- Integrating creativity with structured frameworks
- Case Study: Innovative product development using DFSS

Module 6: Risk Management and Robust Design

- Identifying potential design risks
- Failure Mode and Effects Analysis (FMEA)
- Ensuring robustness and reliability
- Risk prioritization and mitigation plans
- Tools for proactive risk management
- Case Study: Robust design in automotive industry

Module 7: Lean Integration with DFSS

- Aligning Lean principles with Six Sigma design
- Waste reduction in product development
- Value stream mapping in design processes
- Lean DFSS applications for digital transformation
- Impact on organizational efficiency
- Case Study: Lean DFSS for process optimization

Module 8: Project Execution and Leadership in DFSS

- Key steps in managing DFSS projects
- Roles and responsibilities of DFSS leaders
- Effective stakeholder management
- Tracking and measuring DFSS success
- Leadership skills for DFSS professionals
- Case Study: Leading DFSS project in a service organization

Training Methodology

- Instructor-led interactive lectures
- Group discussions and brainstorming sessions
- Real-world case study analysis
- Hands-on exercises and project simulations
- Continuous assessments and feedback mechanisms

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/design-for-six-sigma-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
