Digital Identity & Authentication Strategies in Public Sector Training Course

Public Sector Innovation • 10 Days Intensive • Accredited Certification

Course Overview

Digital Identity & Authentication Strategies in Public Sector Training Course explores emerging technologies, regulatory frameworks, cybersecurity considerations, and practical implementation strategies that strengthen digital trust and operational resilience in public institutions.

Key Skills & Software Tools Covered

MS Word • Okta • Ping Identity • IBM Security Verify

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
26 Jan 2026 – 6 Feb 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
26 Jan 2026 – 6 Feb 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Cape Town	Classroom / 10d	**$9,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Addis Ababa	Classroom / 10d	**$6,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Singapore	Classroom / 10d	**$10,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Istanbul	Classroom / 10d	**$10,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Bangkok	Classroom / 10d	**$10,000 USD / KES 110,000**
26 Jan 2026 – 6 Feb 2026	Accra	Classroom / 10d	**$8,000 USD / KES 110,000**
9 Feb 2026 – 20 Feb 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
9 Feb 2026 – 20 Feb 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
9 Feb 2026 – 20 Feb 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Digital Identity & Authentication Strategies in Public Sector Training Course

Introduction

Digital identity and authentication strategies have become critical enablers for secure, efficient, and inclusive public sector service delivery. Governments globally are adopting digital ID systems, biometric verification, and multi-factor authentication to improve citizen access to services, reduce fraud, and streamline administrative processes. Digital Identity & Authentication Strategies in Public Sector Training Course explores emerging technologies, regulatory frameworks, cybersecurity considerations, and practical implementation strategies that strengthen digital trust and operational resilience in public institutions. Participants will gain insights into identity lifecycle management, authentication protocols, secure credential issuance, and integration with national e-governance platforms.

The training emphasizes data protection, privacy, and ethical practices in digital identity deployment while providing practical frameworks for implementation at scale. Through case studies, interactive exercises, and scenario-based learning, participants will develop skills to design, manage, and evaluate authentication systems that ensure secure, transparent, and inclusive public services. By the end of the course, learners will be equipped to implement innovative digital identity strategies, mitigate security risks, and enhance citizen trust across government services.

Course Objectives

- Understand the principles and importance of digital identity in the public sector.
- Explore emerging technologies for secure authentication and identity verification.
- Implement identity lifecycle management strategies for citizens and government staff.
- Apply multi-factor and biometric authentication techniques to enhance security.
- Design policies and procedures that comply with privacy regulations and standards.
- Integrate digital identity systems with e-governance platforms and public services.
- Evaluate risks, vulnerabilities, and mitigation strategies for authentication systems.
- Implement secure credential issuance, storage, and access control protocols.
- Assess identity proofing, authentication, and verification workflows.
- Monitor and maintain the integrity of digital identity systems.
- Develop strategies to ensure inclusive access for underserved populations.
- Analyze case studies of successful digital identity and authentication implementations.
- Build long-term digital identity governance and compliance frameworks.

Organizational Benefits

- Enhanced security and reduced risk of identity fraud
- Streamlined public sector service delivery through secure authentication
- Improved citizen trust and satisfaction with government services
- Increased efficiency in identity verification processes
- Compliance with privacy and data protection regulations
- Stronger integration of digital identity with national e-governance platforms
- Improved operational transparency and accountability
- Reduced administrative costs associated with identity management
- Better decision-making through secure access to citizen data
- Increased scalability and sustainability of digital identity initiatives

Target Audiences

- Public sector IT and digital transformation managers
- Government policy and compliance officers
- Identity management and authentication specialists
- Cybersecurity and risk management professionals
- Digital service delivery managers
- System integrators and technical consultants
- Monitoring and evaluation officers in public sector agencies
- Government officials responsible for citizen data and e-services

Course Duration: 10 days

Course Modules

Module 1: Introduction to Digital Identity in the Public Sector

- Overview of digital identity concepts and standards
- Benefits of digital identity for public services
- Risks and challenges in implementation
- Key technologies supporting identity systems
- Frameworks for policy, privacy, and compliance
- Case Study: National digital ID rollout and citizen adoption

Module 2: Identity Lifecycle Management

- Enrollment, identity proofing, and credential issuance
- Authentication and verification workflows
- Credential renewal, suspension, and revocation
- Identity data storage and security considerations

- Integration with service delivery platforms
- Case Study: Lifecycle management in a national ID program

Module 3: Authentication Methods and Technologies

- Password-based authentication and challenges
- Multi-factor authentication (MFA) techniques
- Biometric authentication (fingerprint, facial, iris)
- Mobile and digital token-based authentication
- Federated identity and single sign-on (SSO) solutions
- Case Study: Implementing MFA for a government portal

Module 4: Biometric Identity Systems

- Introduction to biometric modalities
- Data capture, template creation, and matching algorithms
- Biometric authentication in citizen services
- Privacy, security, and ethical considerations
- Scalability and interoperability challenges
- Case Study: Fingerprint and facial recognition in e-governance

Module 5: Privacy and Data Protection

- Data protection principles and regulations (GDPR, local laws)
- Consent management and data minimization strategies
- Encryption, secure storage, and transmission of identity data
- Anonymization and pseudonymization techniques
- Privacy-by-design in digital identity systems
- Case Study: Ensuring privacy compliance in a national ID database

Module 6: Risk Management in Digital Identity

- Threat assessment and vulnerability analysis
- Identity fraud detection techniques
- Incident response and breach management
- Continuous monitoring and auditing
- Risk mitigation strategies for digital identity systems
- Case Study: Fraud prevention in a government authentication system

Module 7: Identity Proofing and Verification

- Methods for verifying citizen identities
- Document-based and digital verification techniques
- Remote and in-person identity proofing processes
- Verification workflows for high-risk transactions
- Integration with government registries and databases
- Case Study: Remote identity verification for social service delivery

Module 8: Digital Credentials and Certificates

- Types of digital credentials for public sector services
- Secure issuance and lifecycle management of credentials
- Smart cards, e-passports, and mobile credentials
- Certificate authorities and trust frameworks
- Authentication with digital certificates
- Case Study: E-passport and government credential management

Module 9: Access Control and Authorization

- Role-based and attribute-based access control models
- Policy enforcement for sensitive government data

- Segregation of duties and least privilege principles
- Access auditing and logging
- Identity federation and cross-agency access
- Case Study: Role-based access management in a government ministry

Module 10: Interoperability and Standards

- National and international standards for digital identity
- Protocols for interoperability (SAML, OAuth, OpenID Connect)
- Data exchange across government platforms
- Integration with service providers and third parties
- Ensuring system scalability and future-proofing
- Case Study: Multi-agency identity system integration

Module 11: Digital Identity in Public Services

- Use cases in social services, healthcare, and taxation
- Benefits of digital identity for citizen engagement
- Service delivery optimization through secure identity systems
- Challenges in public sector adoption
- Measuring performance and impact
- Case Study: Streamlining citizen services with digital ID

Module 12: Emerging Technologies and Trends

- Blockchain for identity and authentication
- AI and machine learning in identity verification
- Decentralized digital identity frameworks
- Cloud-based identity solutions
- Mobile-first approaches for citizen access
- Case Study: Blockchain-based identity pilot for government services

Module 13: Governance and Policy Frameworks

- Institutional frameworks for identity management
- Data stewardship and accountability
- Policy alignment with privacy and security laws
- Roles and responsibilities for implementation
- Monitoring compliance and enforcing policies
- Case Study: Establishing a national identity governance board

Module 14: Monitoring, Auditing, and Evaluation

- Continuous monitoring of identity systems
- Compliance audits and reporting
- Measuring service adoption and authentication performance
- KPIs for digital identity and authentication success
- Corrective actions and improvement plans
- Case Study: Performance evaluation of a digital ID ecosystem

Module 15: Implementation Roadmap and Strategy

- Planning and piloting digital identity initiatives
- Scaling strategies for nationwide deployment
- Resource allocation, budgeting, and staffing
- Risk mitigation and sustainability planning
- Change management and stakeholder engagement
- Case Study: National implementation roadmap for secure digital identity

Training Methodology

- Instructor-led lectures and conceptual briefings
- Hands-on workshops for practical application
- Case study analysis and group discussions
- Interactive simulations of authentication workflows
- Demonstrations of digital identity technologies
- Development of action plans and strategic roadmaps

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/digital-identity-authentication-strategies-in-public-sector-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
