DEMOGRAPHY AND POPULATION STUDIES

Emerging Approaches for Measuring Population Health Training Course

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

PROGRAM SPECIFICATIONS & HIGHLIGHTS

DURATION
5 Days Practical Hands-on

DELIVERY MODES
In-Person Class & Live Virtual

CERTIFICATION
Accredited Certificate of Completion

INTAKES / DATES
Multiple Cohort Schedules Included

PREPARED FOR:

Valued Participant

Email: training@datastatresearch.org | Issued: November 21, 2026

Academic & Professional Training Year: 2026

DATASTAT TRAINING INSTITUTE

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Emerging Approaches for Measuring Population Health Training Course

Demography and Population Studies • 5 Days Intensive • Accredited Certification

Course Overview

Emerging Approaches for Measuring Population Health Training Course equips public health professionals, policymakers, and healthcare managers with advanced methodologies to assess health indicators, leverage big data, and implement evidence-based strategies for improved population health management.

Key Skills & Software Tools Covered

MS Word • SAS • SPSS • and Tableau

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
16 Feb 2026 – 20 Feb 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
16 Feb 2026 – 20 Feb 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Cape Town	Classroom / 5d	**$4,500 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Addis Ababa	Classroom / 5d	**$3,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Singapore	Classroom / 5d	**$5,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Istanbul	Classroom / 5d	**$5,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Bangkok	Classroom / 5d	**$5,000 USD / KES 90,000**
16 Feb 2026 – 20 Feb 2026	Accra	Classroom / 5d	**$4,000 USD / KES 90,000**
23 Feb 2026 – 27 Feb 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
23 Feb 2026 – 27 Feb 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
23 Feb 2026 – 27 Feb 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Emerging Approaches for Measuring Population Health Training Course

Introduction

The field of population health is rapidly evolving, driven by advances in data analytics, digital health technologies, and innovative public health strategies. Understanding and measuring population health outcomes has become a cornerstone for designing effective health interventions, reducing health disparities, and improving community well-being. Emerging Approaches for Measuring Population Health Training Course equips public health professionals, policymakers, and healthcare managers with advanced methodologies to assess health indicators, leverage big data, and implement evidence-based strategies for improved population health management. Participants will gain practical skills in integrating traditional metrics with emerging analytical tools, enabling data-driven decision-making in complex health systems.

This course emphasizes contemporary trends in health measurement, including the use of AI-driven analytics, social determinants of health (SDH) frameworks, geospatial mapping, and predictive modeling. Participants will engage in hands-on exercises, case studies, and collaborative learning sessions that highlight innovative techniques in population health assessment. By combining theoretical knowledge with practical applications, this course ensures participants are prepared to influence health policy, optimize community health programs, and foster measurable improvements in population outcomes. The course also highlights the critical role of interdisciplinary collaboration, digital health literacy, and adaptive evaluation strategies in achieving sustainable health improvements.

Course Objectives

- Develop advanced competencies in emerging population health measurement methodologies.
- Integrate big data analytics for population health insights.
- Apply AI and machine learning models for predicting health trends.
- Evaluate social determinants of health and their impact on outcomes.
- Utilize geospatial analysis to identify community health risks.
- Measure health equity and disparities across populations.
- Design evidence-based interventions informed by population-level data.
- Apply digital health tools for real-time monitoring of population health.
- Interpret health metrics to inform policy and strategic decisions.
- Implement predictive modeling for health system planning.
- Conduct population health needs assessments with actionable insights.
- Translate research findings into practical public health strategies.
- Enhance cross-sector collaboration for sustainable health initiatives.

Organizational Benefits

- Improved health system decision-making through advanced analytics.
- Enhanced ability to identify and address health disparities.
- Strengthened capacity for evidence-based program design.
- Increased operational efficiency through data-driven interventions.
- Better resource allocation based on predictive modeling insights.
- Support for organizational compliance with population health standards.
- Enhanced workforce competencies in digital and AI health tools.
- Strengthened strategic planning capabilities for health outcomes.
- Improved community engagement through data-informed interventions.
- Elevated organizational reputation as a leader in innovative health practices.

Target Audiences

- Public health professionals and epidemiologists
- Healthcare administrators and managers
- Policy makers and government health officials
- Health data analysts and statisticians
- Community health workers
- Healthcare IT specialists
- Academic researchers in health sciences
- NGOs and international health organizations

Course Duration: 5 days

Course Modules

Module 1: Introduction to Population Health Measurement

- Overview of population health frameworks
- Key health indicators and metrics
- Comparative analysis of global health outcomes
- Data collection techniques and sources
- Challenges in population health measurement
- Case Study: National Health Survey Analysis

Module 2: Social Determinants of Health in Measurement

- Understanding SDH frameworks
- Linking SDH to health outcomes
- Data integration for SDH analysis
- Identifying at-risk populations

- Policy implications of SDH findings
- Case Study: Community Health Equity Assessment

Module 3: Digital Health Tools for Population Measurement

- Use of wearable devices and mobile health apps
- Telehealth data integration
- Real-time monitoring systems
- Data privacy and security considerations
- Evaluating digital health interventions
- Case Study: Mobile Health Implementation Impact

Module 4: Big Data Analytics in Population Health

- Sources of big data in health systems
- Data cleaning and preprocessing methods
- Analytical frameworks for large datasets
- Visualization techniques for population trends
- Challenges in big data utilization
- Case Study: Predicting Chronic Disease Incidence

Module 5: AI and Machine Learning in Health Metrics

- Introduction to predictive modeling
- Risk stratification using AI
- Algorithm validation and reliability
- Identifying patterns in health outcomes
- Ethical considerations in AI applications
- Case Study: Machine Learning for Hospital Readmission Rates

Module 6: Geospatial Analysis for Population Health

- Mapping health outcomes across regions
- GIS tools for public health
- Identifying geographic disparities
- Integrating spatial data with population datasets
- Policy applications of geospatial insights
- Case Study: Mapping Obesity Prevalence in Urban Areas

Module 7: Measuring Health Equity and Disparities

- Defining health equity and disparity metrics
- Comparative analysis across populations
- Tools for equity assessment
- Strategies to address inequities
- Evaluating interventions for underserved communities
- Case Study: Reducing Infant Mortality Inequalities

Module 8: Translating Data into Public Health Strategies

- Evidence-based decision making
- Data-driven program planning
- Stakeholder engagement in population health
- Evaluating intervention outcomes
- Reporting and communicating health metrics
- Case Study: Implementing Community-Based Health Programs

Training Methodology

- Interactive lectures with real-world examples
- Hands-on exercises with digital and analytical tools

- Case study analyses for practical application
- Group discussions and collaborative problem-solving
- Role-playing scenarios to simulate population health interventions
- Continuous feedback and evaluation for skill enhancement

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/emerging-approaches-for-measuring-population-health-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
