Integrated Urban Systems Design Training Course

Introduction

Integrated Urban Systems Design (IUSD) is a cutting-edge, multidisciplinary training course focused on the development of smart cities, sustainable urban infrastructure, climate-resilient planning, and data-driven urban governance. Integrated Urban Systems Design Training Course equips professionals with advanced competencies in urban analytics, GIS-based planning, digital twin cities, transport integration, energy-efficient systems, and nature-based solutions. It bridges architecture, civil engineering, urban planning, environmental science, and digital technology to create future-ready cities that are inclusive, efficient, and resilient.

With rapid urbanization, cities face increasing challenges such as traffic congestion, housing deficits, climate change impacts, resource inefficiency, and informal settlement growth. This course introduces participants to systems thinking, urban informatics, AI-powered planning tools, and policy-driven design frameworks. Learners will gain hands-on exposure to real-world urban transformation projects, enabling them to design cities that are livable, scalable, low-carbon, and technologically integrated.
