## Course Curriculum & Modules

**ISO 41001:2018 Facility Management Systems Training Course**

**Introduction**

**ISO 41001:2018 Facility Management Systems Training Course is designed to provide comprehensive knowledge and practical skills required to implement, manage, and audit facility management systems effectively. Facility management is increasingly recognized as a strategic discipline that supports the core business, ensuring improved efficiency, compliance, and sustainability. This course focuses on global best practices, risk management, performance improvement, and integration of facility management with organizational objectives. By mastering these skills, participants will gain expertise in managing resources, infrastructure, people, and processes aligned with the ISO 41001 framework.**

**The training provides participants with the competencies required to align facility management strategies with international standards. It addresses critical aspects such as leadership, operational planning, lifecycle management, sustainability, and continuous improvement. Real-world case studies, interactive discussions, and practical scenarios will ensure participants acquire both theoretical knowledge and hands-on skills to enhance organizational performance. This course will equip professionals with the confidence to implement ISO 41001:2018 in diverse industries while contributing to long-term resilience and value creation.**

### Course Objectives

- Understand the scope and principles of ISO 41001:2018 Facility Management Systems.
- Identify facility management roles in enhancing business efficiency and sustainability.
- Learn to integrate facility management systems with organizational strategies.
- Gain skills in risk management and compliance within facilities operations.
- Explore methods for improving operational performance and resource utilization.
- Understand documentation requirements and ISO 41001:2018 compliance obligations.
- Develop competence in leadership and stakeholder engagement for FM systems.
- Apply facility management lifecycle planning and infrastructure optimization.
- Assess energy efficiency, environmental sustainability, and cost-effectiveness.
- Analyze internal audit processes and continual improvement techniques.
- Learn to monitor, measure, and evaluate facility performance metrics.
- Gain practical insights from global best practices and benchmarking.
- Prepare for ISO 41001:2018 certification audits and compliance readiness.

Organizational Benefits

- Enhanced facility management efficiency and cost savings.
- Improved sustainability practices and reduced environmental impact.
- Stronger alignment of FM systems with strategic business goals.
- Increased stakeholder confidence and organizational reputation.
- Streamlined compliance with ISO 41001:2018 standards.
- Better risk management and business continuity.
- Enhanced workforce productivity and workplace satisfaction.
- Global competitiveness through international standard adoption.
- Data-driven decision-making for facilities optimization.
- Continuous improvement culture within facilities operations.

Target Audiences

- Facility managers and supervisors
- Health, safety, and environment officers
- Operations and maintenance professionals
- Facility consultants and auditors
- Senior management and decision-makers
- Sustainability and energy managers
- Project and construction managers
- Quality management system professionals

Course Duration: 5 days
