Center for Advanced Research & Professional Development

Nairobi Training Center • Global Virtual Academy • Corporate On-Site

TAXATION AND REVENUE

Machine Learning Applied to Tax Risk Scoring Training Course

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

PROGRAM SPECIFICATIONS & HIGHLIGHTS

DURATION
10 Days Practical Hands-on

DELIVERY MODES
In-Person Class & Live Virtual

CERTIFICATION
Accredited Certificate of Completion

INTAKES / DATES
Multiple Cohort Schedules Included

PREPARED FOR:

Valued Participant

Email: training@datastatresearch.org | Issued: November 21, 2026

Academic & Professional Training Year: 2026

DATASTAT TRAINING INSTITUTE

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Machine Learning Applied to Tax Risk Scoring Training Course

Taxation and Revenue • 10 Days Intensive • Accredited Certification

Course Overview

Machine Learning Applied to Tax Risk Scoring Training Course focuses on leveraging predictive analytics, advanced algorithms, and data-driven strategies to assess taxpayer behavior, prioritize audits, and mitigate revenue risks.

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
29 Dec 2025 – 9 Jan 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
29 Dec 2025 – 9 Jan 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Cape Town	Classroom / 10d	**$9,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Addis Ababa	Classroom / 10d	**$6,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Singapore	Classroom / 10d	**$10,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Istanbul	Classroom / 10d	**$10,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Bangkok	Classroom / 10d	**$10,000 USD / KES 110,000**
29 Dec 2025 – 9 Jan 2026	Accra	Classroom / 10d	**$8,000 USD / KES 110,000**
12 Jan 2026 – 23 Jan 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
12 Jan 2026 – 23 Jan 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
12 Jan 2026 – 23 Jan 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

The evolution of digital taxation has accelerated the adoption of machine learning in enhancing tax risk scoring, enabling tax authorities to detect anomalies, predict non-compliance, and optimize revenue collection. Machine Learning Applied to Tax Risk Scoring Training Course focuses on leveraging predictive analytics, advanced algorithms, and data-driven strategies to assess taxpayer behavior, prioritize audits, and mitigate revenue risks. Participants will gain hands-on experience in applying machine learning techniques to real-world tax datasets, fostering proactive compliance and strategic decision-making.

Machine learning has transformed the tax compliance landscape by introducing automation, pattern recognition, and anomaly detection that significantly reduce human error. By integrating these capabilities, tax authorities can enhance efficiency, improve accuracy in risk scoring, and uncover hidden patterns of evasion. This course emphasizes practical applications, case studies, and cutting-edge tools, ensuring participants are equipped with the latest skills to implement machine learning in tax risk management.

Course Objectives

1. Understand the fundamentals of machine learning in tax administration
2. Analyze taxpayer behavior using predictive analytics
3. Develop risk scoring models for effective compliance management
4. Apply anomaly detection algorithms to large tax datasets
5. Integrate big data analytics into tax risk assessment
6. Leverage regression, classification, and clustering techniques
7. Build automated audit prioritization models

8. Evaluate model performance using validation and testing metrics
9. Identify patterns of tax evasion using AI-powered tools
10. Implement supervised and unsupervised machine learning methods
11. Enhance decision-making with data-driven insights
12. Explore real-world case studies of tax risk scoring applications
13. Adopt ethical and regulatory considerations in machine learning models

Organizational Benefits

· Improved accuracy in tax risk scoring
· Faster identification of high-risk taxpayers
· Enhanced audit prioritization and resource allocation
· Reduced revenue leakage and compliance gaps
· Increased efficiency in tax administration processes
· Data-driven decision-making for strategic planning
· Proactive identification of emerging tax risks
· Enhanced transparency and accountability
· Cost-effective utilization of analytics tools
· Strengthened compliance culture across departments

Target Audiences

1. Tax auditors and inspectors
2. Revenue officers and analysts
3. Tax compliance managers
4. Risk management professionals
5. Data scientists in government agencies
6. IT professionals supporting tax systems
7. Policy makers and regulators
8. Financial controllers and accountants

Course Duration: 10 days

Course Modules

Module 1: Introduction to Machine Learning in Taxation

· Overview of machine learning applications in taxation
· Importance of tax risk scoring
· Differences between traditional and AI-driven risk assessment
· Challenges and opportunities in tax data analytics
· Hands-on case study: Implementing a basic risk scoring model
· Practical discussion on outcomes and lessons learned

Module 2: Data Collection and Preprocessing

· Identifying relevant tax datasets
· Data cleaning and transformation techniques
· Handling missing or inconsistent data
· Feature engineering for risk modeling
· Data security and privacy considerations
· Case study: Preprocessing tax return datasets for modeling

Module 3: Supervised Learning Techniques

· Regression models for predicting tax non-compliance
· Classification algorithms in taxpayer segmentation
· Model training and validation
· Evaluation metrics (accuracy, precision, recall)
· Model optimization strategies

· Case study: Predicting high-risk taxpayers using regression

Module 4: Unsupervised Learning Techniques

· Clustering algorithms for anomaly detection
· Identifying hidden patterns in tax data
· Dimensionality reduction techniques
· Interpretation of clustering results
· Practical exercises with sample datasets
· Case study: Detecting unusual filing patterns with clustering

Module 5: Risk Scoring Models

· Designing a tax risk scoring framework
· Weight assignment for risk factors
· Integrating historical compliance data
· Model calibration and scoring
· Scenario analysis for decision-making
· Case study: Developing a risk scoring model for VAT compliance

Module 6: Big Data and Tax Analytics

· Utilizing large-scale datasets for risk assessment
· Cloud computing and storage solutions
· Real-time analytics for compliance monitoring
· Scalability considerations for models
· Visualization of risk insights
· Case study: Implementing big data analytics in tax collection

Module 7: Anomaly Detection and Fraud Prevention

· Principles of anomaly detection
· Rule-based vs machine learning approaches
· Detecting patterns of tax evasion
· Integration with audit workflows
· Continuous monitoring of taxpayer activity
· Case study: Identifying fraud in corporate tax filings

Module 8: Model Evaluation and Validation

· Importance of model validation
· Cross-validation and testing techniques
· Metrics for model performance assessment
· Error analysis and model improvement
· Reporting results to stakeholders
· Case study: Evaluating predictive models for audit selection

Module 9: Automation in Tax Compliance

· Automating audit selection processes
· Workflow integration with tax systems
· Reducing manual intervention in risk scoring
· Monitoring model outputs
· Continuous improvement strategies
· Case study: Implementing automated risk-based audits

Module 10: Ethics and Regulatory Considerations

· Ethical use of taxpayer data
· Compliance with data protection laws
· Avoiding bias in machine learning models

· Transparency in algorithmic decision-making
· Stakeholder engagement in model implementation
· Case study: Ethical considerations in AI-driven tax compliance

Module 11: Predictive Analytics for Revenue Forecasting

· Using historical data to forecast revenue
· Scenario modeling and simulations
· Incorporating risk scores into forecasting
· Identifying potential revenue shortfalls
· Decision-making support for management
· Case study: Revenue forecasting using risk-adjusted models

Module 12: AI Tools and Software for Tax Analytics

· Overview of machine learning software (Python, R, SAS)
· Tool selection criteria for tax authorities
· Hands-on exercises with AI tools
· Integration with existing tax systems
· Model deployment and monitoring
· Case study: Implementing AI tools in tax agencies

Module 13: Data Visualization and Reporting

· Effective visualization techniques for tax data
· Dashboard creation for decision-makers
· Communicating insights from risk models
· Tools for visual analytics
· Interpretation of key metrics
· Case study: Building a risk scoring dashboard

Module 14: Case Studies in Tax Risk Scoring

· Global examples of ML applications in taxation
· Lessons learned and best practices
· Implementation challenges and solutions
· Comparative analysis of different models
· Strategic implications for revenue collection
· Case study: International application of ML in tax risk scoring

Module 15: Practical Workshop and Capstone Project

· Integration of all course concepts
· Hands-on project using real-world datasets
· Model building, evaluation, and presentation
· Peer review and feedback sessions
· Implementation planning for participants' organizations
· Case study: End-to-end machine learning project in tax compliance

Training Methodology

· Interactive lectures with practical demonstrations
· Hands-on exercises and real-world dataset applications
· Group discussions to share experiences and solutions
· Case study analysis for applied learning
· Capstone projects for skill consolidation
· Continuous assessment and feedback loops

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/machine-learning-applied-to-tax-risk-scoring-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
