Measuring Maternal Mortality & Metrics Training Course

Introduction

Maternal mortality remains a critical global health challenge, with significant disparities across regions and populations. Accurate measurement and monitoring of maternal deaths are essential for improving maternal health outcomes, guiding policy decisions, and achieving Sustainable Development Goals. Measuring Maternal Mortality & Metrics Training Course equips participants with advanced skills in data collection, analysis, and interpretation to understand maternal mortality patterns and implement evidence-based interventions. Participants will gain expertise in both traditional and innovative methods of maternal health metrics, including digital health tools, statistical modeling, and global reporting frameworks.

In addition, this course emphasizes the practical application of maternal mortality metrics in health systems strengthening, program evaluation, and policy development. Through interactive case studies, participants will explore real-world challenges and solutions, enhancing their ability to drive actionable insights in maternal health. By the end of the course, learners will be capable of designing, analyzing, and reporting maternal mortality data effectively, contributing to improved maternal health outcomes at national and organizational levels.

Course Objectives

By the end of this course, participants will be able to:

1. Analyze global and regional maternal mortality trends using reliable data sources.
2. Apply advanced statistical methods to estimate maternal mortality ratios.
3. Implement maternal death surveillance and response (MDSR) systems effectively.
4. Integrate digital health tools for real-time maternal mortality tracking.
5. Utilize demographic and health surveys for maternal mortality estimation.
6. Conduct comprehensive data quality assessments for maternal health metrics.
7. Interpret maternal mortality indicators to guide policy and program decisions.
8. Develop evidence-based recommendations for maternal health improvement.
9. Employ predictive modeling techniques to identify high-risk populations.
