Microbial Enhanced Oil Recovery Training Course

Introduction

Microbial Enhanced Oil Recovery (MEOR) Training Course is designed to equip oil and gas professionals with advanced knowledge and practical skills in microbial enhanced oil recovery, reservoir biotechnology, microbial reservoir stimulation, and sustainable petroleum production. As conventional oil recovery methods become increasingly challenged by declining reservoir pressure, rising production costs, and the need to maximize hydrocarbon recovery, MEOR offers an innovative approach to improving oil displacement and mobilizing residual oil through the application of selected microorganisms and their metabolic products. This comprehensive training course explores the scientific principles, engineering applications, and operational considerations of microbial enhanced oil recovery, including microbial growth and transport, biosurfactant production, biopolymer generation, biogas formation, reservoir wettability alteration, interfacial tension reduction, and selective plugging. Participants will gain insights into reservoir characterization, microbial screening, nutrient formulation, injection strategies, and compatibility assessment to determine the suitability of MEOR technologies for different reservoir conditions.

The course also emphasizes data-driven reservoir optimization, biotechnology innovation, sustainable oilfield operations, and cost-effective production enhancement. Through practical exercises, technical discussions, and industry-based case studies, participants will learn how to evaluate MEOR feasibility, monitor microbial activity, manage operational risks, and measure incremental oil recovery. The program examines the integration of microbial technologies with conventional waterflooding, chemical enhanced oil recovery (EOR), reservoir simulation, and digital oilfield monitoring to support informed field-development decisions. Special attention is given to reservoir temperature, pressure, salinity, permeability, formation-water chemistry, microbial survival, and environmental considerations that influence project performance. By completing this training, participants will be better positioned to assess emerging MEOR technologies, develop field implementation plans, optimize recovery strategies, and contribute to improved reservoir productivity while supporting responsible resource utilization and long-term asset value.
