Course Curriculum & Modules

Public-Private Partnerships (PPP) Project Prioritization Training Course

Introduction

Public-Private Partnerships Project Prioritization Training Course equips professionals with advanced frameworks for evaluating, ranking, and selecting public-private partnership projects according to strategic value, economic viability, social impact, fiscal sustainability, affordability, and implementation readiness. The course develops practical expertise in public-private partnership project pipelines, project screening, multi-criteria decision analysis, value-for-money assessment, risk-adjusted prioritization, infrastructure planning, investment appraisal, and evidence-based decision-making.

Participants will learn how to transform infrastructure needs into prioritized public-private partnership project portfolios using transparent scoring models, stakeholder analysis, demand assessment, financial and economic indicators, and governance criteria. The training emphasizes strategic project selection, data-driven prioritization, sustainable infrastructure investment, public sector value creation, private sector attractiveness, and alignment with national development priorities, while incorporating international best practices and global public-private partnership case studies.

Course Objectives

By the end of the course, participants will be able to:

- Apply advanced public-private partnership project prioritization frameworks.
- Conduct strategic project screening and eligibility assessment.
- Apply multi-criteria decision analysis techniques.
- Evaluate economic, financial, social, and environmental impacts.
- Assess affordability, fiscal sustainability, and value for money.
- Develop transparent public-private partnership project scoring models.
- Analyze project risks and implementation readiness.
- Align public-private partnership projects with national infrastructure strategies.
- Evaluate stakeholder priorities and public interest.
- Develop evidence-based public-private partnership project pipelines.
- Apply data analytics to infrastructure prioritization.
- Strengthen public-private partnership governance and investment decisions.
- Establish monitoring frameworks for prioritized projects.

Organizational Benefits

- Improved infrastructure investment decisions.
- Stronger public-private partnership project pipelines.
- Better allocation of public resources.
- Enhanced value-for-money outcomes.
- Improved fiscal risk management.
- Greater transparency in project selection.
- Stronger investor confidence.
- Better alignment with development priorities.
- Reduced project preparation failures.
- More sustainable infrastructure portfolios.

Target Audiences

- Public-private partnership unit professionals and managers.
- Government infrastructure planners.
- Public investment management specialists.
- Project finance professionals.
- Infrastructure development managers.
- Economic and financial analysts.
- Policy and regulatory professionals.
- Consultants and private sector investors.

Course Duration: 5 days

Course Modules

Module 1: Foundations of Public-Private Partnership Project Prioritization

- Principles and objectives of public-private partnership project prioritization.
- Infrastructure needs assessment and project identification.
- Public-private partnership eligibility and strategic alignment criteria.
- Project screening frameworks and decision gates.
- Prioritization governance and institutional responsibilities.
- Global case study: United Kingdom public-private partnership infrastructure pipeline.

Module 2: Strategic Project Screening and Selection

- Strategic, economic, financial, and social screening.
- Project readiness and implementation capacity assessment.
- Demand, market, and service-delivery considerations.
- Initial risk and affordability screening.
- Project scoring and ranking methodologies.

- Global case study: Australia infrastructure prioritization.

Module 3: Multi-Criteria Decision Analysis

- Designing multi-criteria prioritization frameworks.
- Weighting criteria and scoring project alternatives.
- Qualitative and quantitative evaluation techniques.
- Sensitivity analysis and ranking validation.
- Decision dashboards and prioritization matrices.
- Global case study: European infrastructure project appraisal.

Module 4: Economic, Financial and Value-for-Money Assessment

- Economic cost-benefit analysis for public-private partnership projects.
- Financial viability and investment attractiveness.
- Affordability and fiscal impact assessment.
- Value-for-money and lifecycle cost analysis.
- Revenue potential and funding considerations.
- Global case study: Canadian public-private partnership project evaluation.

Module 5: Risk, Sustainability and Project Readiness

- Identification and prioritization of project risks.
- Climate, environmental, and social sustainability assessment.
- Fiscal risk and contingent liability analysis.
- Technical, legal, institutional, and commercial readiness.
- Risk-adjusted project prioritization.
- Global case study: South African infrastructure planning.

Module 6: Public-Private Partnership Pipeline Development and Portfolio Management

- Developing strategic public-private partnership project pipelines.
- Categorizing projects by priority and readiness.
- Portfolio balancing and resource allocation.
- Managing competing infrastructure priorities.
- Pipeline review and project progression mechanisms.
- Global case study: Philippine public-private partnership project pipeline.

Module 7: Stakeholder Engagement and Governance

- Stakeholder mapping and priority assessment.
- Public interest and service-delivery considerations.
- Inter-agency coordination and decision accountability.
- Transparency, governance, and anti-bias mechanisms.
- Communicating prioritization decisions to stakeholders.
- Global case study: Indian public-private partnership infrastructure governance.

Module 8: Advanced Prioritization, Monitoring and Implementation

- Data-driven public-private partnership prioritization and analytics.
- Scenario modelling and portfolio optimization.
- Monitoring priority projects and decision triggers.
- Updating project rankings as conditions change.
- Executive reporting and investment recommendations.
- Global case study: Singapore infrastructure prioritization.

Training Methodology

- Instructor-led presentations and expert briefings.
- Interactive workshops and facilitated discussions.
- Practical project screening and scoring exercises.

- Multi-criteria decision analysis simulations.
- Group-based public-private partnership pipeline development exercises.
- Global case studies and comparative benchmarking.
- Scenario-based risk and investment analysis.
- Participant presentations, feedback, and action planning.
