Public-Private Partnerships Project Valuation Training Course

Introduction

Public-Private Partnerships Project Valuation Training Course provides comprehensive professional training in public-private partnership project valuation, financial modelling, investment appraisal, risk analysis, and value-for-money assessment. The course develops practical capabilities for evaluating the financial and economic viability of Public-Private Partnerships (PPP) projects across infrastructure, transport, energy, healthcare, water, and other public service sectors. Participants will explore project valuation techniques, discounted cash flow analysis, net present value, internal rate of return, weighted average cost of capital, sensitivity analysis, scenario analysis, revenue forecasting, lifecycle costing, and public-sector affordability.

The programme emphasizes modern PPP project finance, bankability assessment, commercial viability, risk-adjusted valuation, financial structuring, and investment decision-making. Through practical exercises and global case studies, participants will learn how governments, PPP units, investors, lenders, developers, and advisers assess project value, allocate risks, determine appropriate returns, and support evidence-based investment decisions.
