Building Capacity in Training and Research

# DATASTAT TRAINING IN

OFFICIAL COURSE PROSPECTUS

Center for Advanced Research & Professional Development

Nairobi Training Center • Global Virtual Academy • Corporate On-Site

LOGISTICS AND SUPPLY CHAIN MANAGEMENT

# Risk Modeling for Supply Chains Training Course

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

## PROGRAM SPECIFICATIONS & HIGHLIGHTS

DURATION
**10 Days Practical Hands-on**

DELIVERY MODES
**In-Person Class & Live Virtual**

CERTIFICATION
**Accredited Certificate of Completion**

INTAKES / DATES
**Multiple Cohort Schedules Included**

PREPARED FOR:

**Valued Participant**

Email: training@datastatresearch.org | Issued: November 21, 2026

**Academic & Professional Training Year: 2026**

**DATASTAT TRAINING INSTITUTE**

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Email: training@datastatresearch.org

# Risk Modeling for Supply Chains Training Course

**Logistics and Supply Chain Management • 10 Days Intensive • Accredited Certification**

## Course Overview

Risk Modeling for Supply Chains Training Course is designed to equip professionals with advanced analytical tools, predictive modeling techniques, and strategic insights to proactively identify, assess, and mitigate supply chain risks.

### Key Skills & Software Tools Covered

MS Word • AnyLogic • RiskWatch • and Palisade @RISK

## Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

| TRAINING DATES | LOCATION / VENUE | FORMAT / DURATION | INVESTMENT (FEE) |
|---|---|---|---|
| **23 Feb 2026 – 6 Mar 2026** | Istanbul | Classroom / 10d | **$10,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Bangkok | Classroom / 10d | **$10,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Accra | Classroom / 10d | **$8,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Nairobi | Classroom / 10d | **$3,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Kigali | Classroom / 10d | **$6,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Dubai | Classroom / 10d | **$10,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Cape Town | Classroom / 10d | **$9,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Addis Ababa | Classroom / 10d | **$6,000 USD / KES 220,000** |
| **23 Feb 2026 – 6 Mar 2026** | Singapore | Classroom / 10d | **$10,000 USD / KES 220,000** |
| **9 Mar 2026 – 20 Mar 2026** | Nairobi | Classroom / 10d | **$3,000 USD / KES 220,000** |
| **9 Mar 2026 – 20 Mar 2026** | Kigali | Classroom / 10d | **$6,000 USD / KES 220,000** |
| **9 Mar 2026 – 20 Mar 2026** | Dubai | Classroom / 10d | **$10,000 USD / KES 220,000** |

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

## Course Curriculum & Modules

**Risk Modeling for Supply Chains Training Course**

**Introduction**

**The global business landscape is increasingly exposed to uncertainties and disruptions that threaten supply chain efficiency and organizational resilience. Risk Modeling for Supply Chains Training Course is designed to equip professionals with advanced analytical tools, predictive modeling techniques, and strategic insights to proactively identify, assess, and mitigate supply chain risks. Participants will gain expertise in scenario analysis, probabilistic modeling, and risk assessment frameworks, enabling organizations to minimize operational losses, enhance decision-making, and sustain competitive advantage in volatile markets. This course emphasizes practical application through case studies, interactive simulations, and real-world supply chain scenarios.**

**In addition to technical risk modeling skills, the course focuses on fostering strategic thinking, cross-functional collaboration, and data-driven decision-making. Professionals will learn to anticipate supply chain disruptions, optimize inventory and logistics planning, and implement risk mitigation strategies aligned with organizational goals. The course also highlights the integration of digital tools, AI, and big data analytics in managing complex supply chain networks. By combining theoretical knowledge with applied learning, participants will emerge with actionable insights to strengthen organizational resilience, ensure continuity, and drive sustainable growth.**

### Course Objectives

By the end of this training, participants will be able to:

- Identify key risk factors in global supply chains.
- Develop comprehensive supply chain risk models using statistical and computational methods.
- Conduct probabilistic risk assessments to predict potential disruptions.
- Utilize scenario planning to evaluate the impact of risk events.
- Apply AI and machine learning tools for predictive risk analytics.
- Design and implement risk mitigation strategies across supply chain functions.
- Optimize inventory, procurement, and logistics in high-risk environments.
- Integrate real-time data for dynamic supply chain monitoring.
- Enhance decision-making through simulation and modeling techniques.
- Assess supplier and vendor risk profiles effectively.
- Implement business continuity planning for critical supply chain operations.
- Improve resilience through strategic contingency planning.
- Analyze case studies to derive actionable lessons in risk management.

Organizational Benefits

- Improved operational resilience in volatile environments.
- Enhanced decision-making with predictive analytics.
- Reduced financial losses from supply chain disruptions.
- Optimized inventory and logistics planning.
- Stronger supplier and vendor risk management.
- Improved compliance with industry standards.
- Increased strategic agility and market responsiveness.
- Better integration of digital and AI tools for supply chain management.
- Strengthened cross-functional collaboration within the organization.
- Enhanced organizational reputation for reliability and efficiency.

Target Audiences

- Supply chain managers and planners
- Risk management professionals
- Procurement and sourcing specialists
- Logistics and operations managers
- Data analysts in supply chain functions
- Business continuity and resilience officers
- Consultants in supply chain and operations
- Executives responsible for strategic supply chain decisions

Course Duration: 10 days

Course Modules

### Module 1: Introduction to Supply Chain Risk Management

- Overview of supply chain risk concepts
- Types of risks in global supply chains
- Risk identification techniques
- Key performance indicators for risk management
- Case Study: Supply chain disruption in automotive industry
- Group exercise on risk mapping

### Module 2: Risk Assessment Frameworks

- Qualitative and quantitative risk assessments
- Probability and impact analysis
- Risk prioritization matrices
- Scenario analysis techniques
- Case Study: Pharmaceutical supply chain risks

- Risk scoring workshop

### Module 3: Data Analytics for Risk Modeling

- Introduction to predictive analytics
- Data collection and preprocessing
- Statistical modeling for risk assessment
- Regression and correlation analysis
- Case Study: Food supply chain risk modeling
- Hands-on exercises with real datasets

### Module 4: Probabilistic Risk Models

- Monte Carlo simulations
- Bayesian networks for risk analysis
- Stochastic modeling approaches
- Sensitivity analysis
- Case Study: Electronics supply chain risk probability
- Practical simulation exercises

### Module 5: Scenario Planning and Stress Testing

- Developing multiple risk scenarios
- Impact evaluation on supply chain functions
- Stress testing frameworks
- Strategic decision-making under uncertainty
- Case Study: Logistics network stress testing
- Scenario workshop

### Module 6: Supplier and Vendor Risk Management

- Supplier risk profiling
- Vendor evaluation techniques
- Monitoring and compliance practices
- Risk mitigation strategies for suppliers
- Case Study: Supplier bankruptcy impact
- Vendor risk assessment exercise

### Module 7: Inventory and Logistics Optimization under Risk

- Safety stock calculation methods
- Inventory buffers for risk mitigation
- Transport risk modeling
- Cost vs. risk trade-offs
- Case Study: E-commerce logistics optimization
- Group activity on logistics planning

### Module 8: Digital Tools for Risk Monitoring

- AI and machine learning in risk modeling
- Real-time supply chain monitoring systems
- Data visualization for risk insights
- Predictive dashboards
- Case Study: Digital twin implementation in supply chains
- Practical software demonstration

### Module 9: Business Continuity Planning

- Continuity planning frameworks
- Contingency planning for critical nodes
- Crisis response strategies

- Recovery and restoration protocols
- Case Study: Natural disaster impact on supply chain
- Group exercise on business continuity

### Module 10: Risk Mitigation Strategies

- Hedging and diversification strategies
- Insurance and financial risk management
- Redundancy and flexible sourcing
- Risk-sharing agreements
- Case Study: Multi-sourcing success story
- Strategy development workshop

### Module 11: Regulatory and Compliance Risks

- Compliance frameworks for global supply chains
- Risk of regulatory breaches
- Ethical sourcing and sustainability risks
- Legal implications of supply chain disruptions
- Case Study: Regulatory non-compliance in chemicals industry
- Compliance assessment exercise

### Module 12: Simulation and Modeling Applications

- Advanced simulation techniques
- System dynamics modeling
- Supply chain network optimization
- Scenario testing using simulation tools
- Case Study: Manufacturing plant simulation under risk
- Hands-on simulation exercise

### Module 13: Risk Communication and Reporting

- Effective risk communication strategies
- Reporting structures and dashboards
- Stakeholder engagement in risk management
- Risk culture development
- Case Study: Corporate communication during supply chain crisis
- Group presentation exercise

### Module 14: Advanced Predictive Risk Analytics

- Machine learning for risk prediction
- Predictive algorithms and forecasting
- AI-driven risk dashboards
- Integration of big data sources
- Case Study: Predictive analytics in retail supply chains
- Practical AI analytics session

### Module 15: Capstone Case Study and Review

- Comprehensive risk modeling case study
- Integration of learned techniques
- Presentation and discussion of solutions
- Peer feedback and assessment
- Lessons learned and key takeaways
- Wrap-up workshop

Training Methodology

- Interactive lectures and presentations

- Hands-on practical exercises
- Real-world case studies and simulations
- Group discussions and workshops
- Use of digital tools and software demonstrations
- Continuous assessment and feedback

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

## Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

## How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/risk-modeling-for-supply-chains-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
