Course Curriculum & Modules

SAP S/4HANA Transition and Migration Training Course

Introduction

SAP S/4HANA Transition and Migration Training Course is a cutting-edge program designed for professionals aiming to master the strategic and technical aspects of migrating to SAP S/4HANA. With the rapid digital transformation in enterprise systems, organizations require skilled consultants who can seamlessly navigate the complexities of SAP S/4HANA implementation, deployment, and integration. This course emphasizes real-world case studies, hands-on practical exercises, and end-to-end migration strategies, ensuring participants gain actionable insights into system conversion, data migration, process optimization, and performance enhancement.

This training equips participants with the skills to lead SAP S/4HANA projects with confidence, combining technical expertise with business process acumen. Leveraging best practices, SAP Activate methodology, and intelligent automation tools, learners will understand how to plan, execute, and optimize S/4HANA migrations efficiently. By the end of this program, participants will have developed a strong foundation in risk mitigation, custom code adaptation, data cleansing, and post-migration support, making them indispensable assets for enterprises undergoing digital transformation initiatives.

Course Duration

5 days

Course Objectives

- Master the SAP S/4HANA architecture and landscape overview
- Execute SAP system conversion and greenfield migration strategies

- Apply SAP Activate methodology for project delivery
- Perform data migration using SAP Data Services and Migration Cockpit
- Optimize business processes with embedded analytics and Fiori apps
- Adapt and test custom code in S/4HANA environment
- Implement real-time reporting and performance monitoring
- Integrate legacy systems and third-party applications
- Conduct post-migration validation and cutover planning
- Ensure compliance with SAP Best Practices and governance policies
- Apply risk mitigation strategies during migration projects
- Gain hands-on experience through case studies and simulations
- Enhance career prospects as an SAP S/4HANA Migration Specialist

Target Audience

- SAP Functional Consultants
- SAP Technical Consultants
- IT Project Managers overseeing SAP implementations
- Business Analysts involved in ERP transformations
- SAP Solution Architects
- Data Migration Specialists
- IT Professionals aspiring to upskill in SAP S/4HANA
- Enterprise Managers and Decision Makers in Digital Transformation

Course Modules

Module 1: Introduction to SAP S/4HANA

- Overview of SAP S/4HANA and digital transformation trends
- Key features and innovations in S/4HANA
- SAP Fiori and UX design principles
- Case study: Global enterprise S/4HANA adoption
- Understanding SAP landscape & deployment options

Module 2: SAP Activate Methodology

- Project preparation and discovery phase
- Fit-to-standard analysis and blueprinting
- Realization and testing strategies
- Deployment and support phases
- Case study: Implementing SAP Activate in a manufacturing firm

Module 3: Migration Strategies

- Greenfield, Brownfield, and Hybrid approaches
- System conversion process overview
- Best practices for minimizing downtime
- Custom code adaptation techniques
- Case study: Brownfield migration in retail sector

Module 4: Data Migration & Management

- SAP Data Services and Migration Cockpit
- Data cleansing, validation, and reconciliation
- Managing master data in S/4HANA
- Real-time vs batch migration considerations
- Case study: Data migration for multinational corporation

Module 5: Business Process Optimization

- Streamlining financial and operational processes
- Leveraging embedded analytics for decision-making

- Fiori apps for improved productivity
- Process harmonization across departments
- Case study: Finance process optimization in a manufacturing company

Module 6: Custom Code Adaptation & Testing

- Analyzing legacy custom code for compatibility
- Code adjustment using SAP tools
- Testing strategies for functional and technical changes
- Regression testing and issue resolution
- Case study: Custom code remediation in automotive sector

Module 7: Integration & Real-Time Reporting

- Integrating third-party systems and legacy applications
- Implementing APIs and SAP Cloud Platform integration
- Real-time reporting with embedded analytics
- Monitoring system performance post-migration
- Case study: Real-time reporting for retail chain

Module 8: Cutover Planning & Post-Migration Support

- Migration cutover strategies and checklists
- Post-go-live support and troubleshooting
- Risk management and compliance measures
- Continuous improvement and optimization
- Case study: Smooth cutover execution in FMCG company

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.
