Structural Simulation Software (ETABS / SAP2000) Training Course

Introduction

Structural Simulation Software (ETABS & SAP2000) Training Course is designed to equip civil and structural engineers with advanced skills in structural analysis, building modeling, seismic design, finite element modeling (FEM), and performance-based engineering. With increasing demand for high-rise buildings, earthquake-resistant structures, and smart infrastructure design, mastery of tools like ETABS and SAP2000 has become essential for modern structural engineering practice. This course emphasizes real-world applications aligned with international building codes (ACI, Eurocode, IS codes) and integrates practical design workflows used in top engineering consultancies worldwide.

This training provides hands-on expertise in 3D structural modeling, load calculations, dynamic analysis, wind and seismic simulations, and nonlinear behavior assessment using ETABS and SAP2000. Participants will learn how to design safe, efficient, and cost-effective structures such as multistory buildings, industrial frames, bridges, and towers. The course bridges the gap between academic theory and professional engineering practice by integrating case-based learning, project simulations, and real structural failure analysis, ensuring learners gain job-ready skills in structural engineering software automation and BIM-integrated workflows.
