Training Course on Airport Pavement Management and Maintenance

Introduction

Efficient Airport Pavement Management (APM) and Maintenance (APM&M) are critical for ensuring aviation safety, operational continuity, and long-term infrastructure sustainability. Modern airports face increasing challenges, including heavier aircraft loads, extreme weather conditions, and the imperative for cost-effective asset management. This comprehensive training program provides aviation professionals with the latest industry best practices, cutting-edge technologies, and strategic approaches to effectively manage and maintain airport pavements, minimizing downtime and optimizing financial resources.

Training Course on Airport Pavement Management and Maintenance emphasizes the integration of data-driven decision-making, advanced inspection techniques, and sustainable pavement solutions. Participants will gain practical skills in implementing Pavement Management Systems (PMS), conducting accurate Pavement Condition Index (PCI) assessments, and developing robust maintenance and rehabilitation (M&R) strategies. By mastering these essential competencies, attendees will contribute significantly to the operational efficiency, safety compliance, and economic viability of their respective airport facilities in an increasingly complex and demanding aviation landscape.
