Training Course on Climate Change Risk for Pension Investments

Introduction

Training Course on Climate Change Risk for Pension Investments is designed for pension fund managers, investment analysts, and financial professionals who need to understand the implications of climate change on investment strategies and portfolio management. As the effects of climate change become increasingly pronounced, pension funds are faced with both risks and opportunities that can significantly impact their financial performance and sustainability. Climate change poses various risks to investments, including physical risks from extreme weather events, transition risks associated with shifting regulatory frameworks and market dynamics, and reputational risks arising from stakeholder expectations for responsible investing. Pension funds must be proactive in identifying, assessing, and managing these risks to protect beneficiaries' interests and ensure long-term viability.

This course will delve into the multifaceted nature of climate change risks, exploring how they affect different asset classes and investment strategies. Participants will learn how to integrate climate risk assessments into their investment decision-making processes and develop strategies for mitigating these risks while capitalizing on emerging opportunities in the green economy. Through a combination of theoretical insights, case studies, and practical applications, attendees will gain the knowledge and tools necessary to navigate the complexities of climate change risk in pension investments.

Course Objectives

- Understand Climate Change Risks: Analyze the various types of climate change risks affecting pension investments.
- Evaluate Financial Implications: Assess the potential financial impact of climate change on different asset classes.
