Building Capacity in Training and Research

DATASTAT TRAINING IN

OFFICIAL COURSE PROSPECTUS

Center for Advanced Research & Professional Development

Nairobi Training Center • Global Virtual Academy • Corporate On-Site

SOCIAL PROTECTION

Training course on Interoperability and Data Exchange for Integrated Social Protection Systems

Comprehensive Course Syllabus, Practical Modules & Upcoming Schedules

PROGRAM SPECIFICATIONS & HIGHLIGHTS

- **DURATION**
  10 Days Practical Hands-on
- **DELIVERY MODES**
  In-Person Class & Live Virtual
- **CERTIFICATION**
  Accredited Certificate of Completion
- **INTAKES / DATES**
  Multiple Cohort Schedules Included

PREPARED FOR:

Valued Participant

Email: training@datastatresearch.org | Issued: November 21, 2026

Academic & Professional Training Year: 2026

DATASTAT TRAINING INSTITUTE

P.O. Box 102802-00101, Nairobi, Kenya

Training Centers: Nairobi • Mombasa • Kigali • Dubai • Live Virtual Academy

Tel: +254 724 527 104 | +254 734 969 612

Email: training@datastatresearch.org

Training course on Interoperability and Data Exchange for Integrated Social Protection Systems

Social Protection • 10 Days Intensive • Accredited Certification

Course Overview

Training Course on Interoperability and Data Exchange for Integrated Social Protection Systemsis meticulously designed to equip senior policymakers, social protection program managers, ICT professionals, data architects, legal and compliance officers, public financial management specialists, and development partners with the expert knowledge, strategic frameworks, and practical tools to strategically plan, technically design, and institutionally govern interoperable and integrated social protection systems.

Key Skills & Software Tools Covered

System integration • data exchange • SP databases

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
5 Jan 2026 – 16 Jan 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
5 Jan 2026 – 16 Jan 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Cape Town	Classroom / 10d	**$9,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Addis Ababa	Classroom / 10d	**$6,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Singapore	Classroom / 10d	**$10,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Istanbul	Classroom / 10d	**$10,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Bangkok	Classroom / 10d	**$10,000 USD / KES 110,000**
5 Jan 2026 – 16 Jan 2026	Accra	Classroom / 10d	**$8,000 USD / KES 110,000**
19 Jan 2026 – 30 Jan 2026	Nairobi	Classroom / 10d	**$3,000 USD / KES 220,000**
19 Jan 2026 – 30 Jan 2026	Kigali	Classroom / 10d	**$6,000 USD / KES 110,000**
19 Jan 2026 – 30 Jan 2026	Dubai	Classroom / 10d	**$10,000 USD / KES 110,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Training Course on Interoperability and Data Exchange for Integrated Social Protection Systems

Introduction

The complexity of poverty and vulnerability demands a holistic, coordinated, and efficient response from social protection systems. Too often, however, programs operate in silos, leading to fragmented data, duplicated efforts, inefficiencies, and gaps in service delivery. Interoperability and Data Exchange are the cornerstones of truly integrated social protection systems, enabling seamless information flow between various programs, government agencies, and even with external partners. By connecting social registries, payment systems, civil registration databases, and sectoral information systems (e.g., health, education), countries can achieve a unified view of beneficiaries, improve targeting, reduce fraud, streamline operations, and deliver more responsive and comprehensive support. In a country like Kenya, which has pioneered its Single Registry (ESR) and developed a robust Data Protection Act with specific guidance on data sharing, understanding the strategic, technical, and governance aspects of interoperability is paramount for advancing a truly integrated social safety net. Training Course on Interoperability and Data Exchange for Integrated Social Protection Systemsis meticulously designed to equip senior policymakers, social protection program managers, ICT professionals, data architects, legal and compliance officers, public financial management specialists, and development partners with the expert knowledge, strategic frameworks, and practical tools to strategically plan, technically design, and institutionally govern interoperable and integrated social protection systems. The program delves into the four levels of interoperability (technical, semantic, organizational, legal), data exchange standards and protocols (APIs), the architecture of integrated systems, data governance for shared data, managing data politics, and ensuring robust data privacy and security in interconnected environments, blending rigorous analytical frameworks with practical, hands-on application, extensive global case studies (with a strong emphasis on successful and challenging African experiences, including Kenya's ESR), and intensive system mapping, data flow analysis, and data sharing agreement development exercises. Participants will gain the strategic foresight and technical expertise to confidently lead and participate in building highly integrated and responsive social protection systems, fostering unparalleled efficiency, coordination, and impact in social welfare delivery, thereby securing their position as indispensable leaders in modernizing and harmonizing social safety nets.

This intensive 10-day program delves into nuanced methodologies for conducting comprehensive assessments of existing information system fragmentation, mastering sophisticated techniques for developing common data dictionaries and semantic models to ensure data consistency, and exploring cutting-edge approaches to designing secure Application Programming Interfaces (APIs) for real-time data exchange, implementing blockchain-based solutions for immutable data sharing (where relevant), and establishing robust mechanisms for monitoring data exchange performance and compliance. A significant focus will be placed on understanding the interplay of interoperability with national digital public infrastructure and digital identity systems (e.g., Kenya's Huduma Namba discussions), the specific challenges of overcoming institutional silos and "data politics" in complex governmental structures, and the practical application of change management strategies to foster a culture of collaboration and data sharing. By integrating global industry best practices in e-governance and integrated public service delivery (drawing examples from pioneering national interoperability platforms, India's Aadhaar-linked services, and successful integrated social protection systems in Latin America and Africa), analyzing **real-world examples of successful and challenging interoperability initiatives, and engaging in intensive hands-on data flow mapping, API specification design, legal framework review, stakeholder mapping, and expert-led discussions on fostering cross-agency collaboration, attendees will develop the strategic acumen to confidently lead and participate in building truly integrated social protection systems, ensuring that vital social services are not only seamlessly delivered but also maximize resource utilization, minimize exclusion errors, and genuinely respond to the multi-dimensional needs of vulnerable populations, thereby securing their position as indispensable leaders in driving systemic improvements in social welfare.

Course Objectives:

Upon completion of this course, participants will be able to:

- Analyze core concepts and strategic responsibilities of Interoperability and Data Exchange for integrated social protection systems.
- Master sophisticated techniques for assessing existing data silos and fragmentation within social protection and across government sectors.
- Develop robust methodologies for designing and implementing integrated social protection information systems (MISs) and social registries that enable seamless data exchange.
- Implement effective strategies for applying technical interoperability standards (e.g., APIs, common data formats) for secure and efficient data flow.
- Manage complex considerations for achieving semantic interoperability through common data dictionaries, vocabularies, and metadata.
- Apply robust strategies for establishing comprehensive legal and organizational frameworks for data sharing and exchange in social protection.
- Understand the deep integration of interoperability with national digital identity systems and broader digital public infrastructure.
- Leverage knowledge of global best practices and lessons learned from countries that have successfully integrated social protection systems, with a strong focus on African experiences and Kenya's Single Registry.
- Optimize strategies for overcoming challenges such as data politics, institutional resistance, and capacity gaps in fostering data exchange.
- Formulate specialized recommendations for ensuring data privacy, security, and ethical use in interconnected social protection systems.
- Conduct comprehensive assessments of the benefits, costs, and risks associated with achieving interoperability in social protection.
- Navigate challenging situations related to stakeholder engagement, change management, and continuous improvement in integrated system development.
- Develop a holistic, strategic, and implementable approach to Interoperability and Data Exchange for Integrated Social Protection Systems, fostering coordinated, efficient, and citizen-centric social welfare delivery.

Target Audience:

This course is designed for professionals interested in Interoperability and Data Exchange for Integrated Social Protection Systems:

- Policymakers & Senior Government Officials: From Ministries of Social Protection, ICT, Finance, Planning, and Justice.
- Social Protection Program Managers & Directors: Responsible for program coordination, efficiency, and impact.
- ICT Professionals & Data Architects: Involved in designing, developing, and managing government information systems.
- Data Managers & Analysts: Working with large datasets and across multiple government agencies.
- Legal & Compliance Officers: Focusing on data protection, privacy, and data sharing agreements.
- Public Financial Management (PFM) Specialists: Seeking to improve transparency and accountability in public spending.
- Researchers & Academics: Studying integrated social protection and e-governance.
- Development Partners & International Organizations: Supporting digital transformation and social protection reforms.

Course Duration: 10 Days

Course Modules:

• Module 1: Introduction to Integrated Social Protection Systems (Day 1)

- Defining social protection integration and its rationale (efficiency, effectiveness, equity).
- Understanding the problem of fragmented social protection systems and data silos.
- The role of information systems in enabling integrated social protection.
- Benefits of integrated systems: Reduced duplication, improved targeting, better coordination.
- Overview of the social protection delivery chain and points of integration.

• Module 2: Fundamentals of Interoperability (Day 1)

- Defining interoperability: Technical, semantic, organizational, legal dimensions.
- Why interoperability is crucial for modern public service delivery.
- Distinction between data sharing, data exchange, and full interoperability.
- Key principles for achieving interoperability (e.g., open standards, modularity).
- Challenges of interoperability in developing country contexts.

• Module 3: Technical Interoperability (Day 2)

- Application Programming Interfaces (APIs): Types (REST, SOAP) and their role in data exchange.
- Common data formats: XML, JSON, CSV for structured data exchange.
- Data exchange protocols and messaging patterns.
- Middleware and integration platforms for connecting disparate systems.

- Designing technical architectures for integrated social protection systems.

• Module 4: Semantic Interoperability (Day 3)

- Ensuring shared understanding of data: The challenge of different meanings.
- Developing common data dictionaries and taxonomies.
- The role of metadata, ontologies, and controlled vocabularies.
- Data mapping and transformation techniques for semantic alignment.
- Case studies of semantic challenges and solutions in public sector data.

• Module 5: Organizational and Process Interoperability (Day 4)

- Harmonizing business processes and workflows across different social protection programs.
- Streamlining beneficiary journeys across multiple services.
- Breaking down institutional silos and fostering cross-agency collaboration.
- Developing shared service delivery models and common intake points.
- Change management strategies to support organizational shifts.

• Module 6: Legal and Policy Interoperability (Day 5)

- Establishing robust legal frameworks for data sharing (e.g., Data Protection Acts).
- Developing comprehensive data sharing agreements (DSAs) and Memoranda of Understanding (MoUs).
- Addressing data ownership, stewardship, and usage rights.
- Ensuring compliance with data protection and privacy regulations (e.g., Kenya DPA, GDPR).
- Policy coordination to align objectives across integrated systems.

• Module 7: The Role of Social Registries and Digital Identity (Day 6)

- Deep dive into Social Registries as foundational interoperability enablers (e.g., Kenya's ESR).
- Interoperability with civil registration and national digital identity systems (e.g., Huduma Namba discussions).
- Using unique identifiers for de-duplication and beneficiary linkage.
- Identity verification and authentication in integrated systems.
- Benefits and challenges of centralized vs. decentralized identity models for SP.

• Module 8: Data Governance for Integrated Systems (Day 7)

- Establishing a multi-stakeholder data governance framework for shared data.
- Defining clear roles, responsibilities, and accountability for data stewards.
- Data quality management in an integrated environment.
- Audit trails and monitoring of data access and exchange.
- Strategies for managing "data politics" and fostering trust among agencies.

• Module 9: Data Security and Privacy in Interoperable Systems (Day 8)

- Threats to data in interconnected systems: Data breaches, unauthorized access.
- Implementing robust cybersecurity measures across all integrated components.
- Privacy-enhancing technologies (PETs) for data exchange (e.g., pseudonymization).
- Ensuring informed consent and data minimization in shared environments.
- Developing incident response plans for data breaches in integrated systems.

• Module 10: Implementation Strategies and Project Management (Day 9)

- Phased approach to integration: Starting small, scaling up.
- Cost-benefit analysis and resource mobilization for interoperability initiatives.
- Procurement of interoperable solutions and vendor management.
- Building internal technical and managerial capacity for integrated systems.
- Monitoring and evaluating the effectiveness of interoperability efforts.

• Module 11: Case Studies and Best Practices (Day 9)

- Analyzing successful examples of integrated social protection systems globally (e.g., India's Aadhaar, integrated systems in Latin America, African examples).
- In-depth study of Kenya's Single Registry (ESR) and its data exchange protocols.

- Lessons learned from challenges and failures in interoperability projects.
- Exploring the role of Digital Public Goods (DPGs) and open standards in promoting interoperability.
- Discussions on emerging trends and future directions in integrated SP systems.

• Module 12: Action Planning for Integration (Day 10)

- Participants' assessment of their current organizational/national context for interoperability.
- Developing a roadmap for improving data exchange and integration in their specific environment.
- Identifying priority areas for intervention (e.g., legal, technical, organizational).
- Stakeholder mapping and engagement strategies for integration efforts.
- Presentations of individual/group action plans and peer feedback.

Training Methodology<

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/training-course-on-interoperability-and-data-exchange-for-integrated-social-protection-systems to
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
