Transport Management and Change Control in SAP Training Course

Enterprise Resource Planning (ERP) • 5 Days Intensive • Accredited Certification

Course Overview

Transport Management and Change Control in SAP Training Course is designed to equip professionals with the essential knowledge and skills to efficiently manage the transport and change control processes within the SAP environment.

Upcoming Training Schedules

Confirmed cohort intakes and venues. Both physical in-person classroom and live virtual online seats are available.

TRAINING DATES	LOCATION / VENUE	FORMAT / DURATION	INVESTMENT (FEE)
29 Dec 2025 – 2 Jan 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
29 Dec 2025 – 2 Jan 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Cape Town	Classroom / 5d	**$4,500 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Addis Ababa	Classroom / 5d	**$3,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Singapore	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Istanbul	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Bangkok	Classroom / 5d	**$5,000 USD / KES 90,000**
29 Dec 2025 – 2 Jan 2026	Accra	Classroom / 5d	**$4,000 USD / KES 90,000**
5 Jan 2026 – 9 Jan 2026	Nairobi	Classroom / 5d	**$1,500 USD / KES 110,000**
5 Jan 2026 – 9 Jan 2026	Kigali	Classroom / 5d	**$3,000 USD / KES 90,000**
5 Jan 2026 – 9 Jan 2026	Dubai	Classroom / 5d	**$5,000 USD / KES 90,000**

* Corporate discounts and customized cohort scheduling are available for teams of 3 or more participants.

Course Curriculum & Modules

Transport Management and Change Control in SAP Training Course

Introduction

Transport Management and Change Control in SAP Training Course is designed to equip professionals with the essential knowledge and skills to efficiently manage the transport and change control processes within the SAP environment. SAP’s transport management system (TMS) is vital for the seamless transfer of objects between different SAP systems, ensuring smooth operations across diverse environments such as development, quality, and production. This course offers an in-depth understanding of how to configure, monitor, and troubleshoot transport routes, alongside comprehensive training in SAP's Change Control mechanisms. By mastering these processes, participants will be able to significantly enhance the integrity, reliability, and traceability of their SAP systems, mitigating risks associated with system updates and changes.

In today’s rapidly evolving business landscape, SAP Transport Management & Change Control are integral to managing SAP landscapes and ensuring that software releases and changes are executed in a secure and efficient manner. This course also emphasizes best practices for minimizing downtime during changes, optimizing resource allocation, and ensuring compliance with industry standards. Attendees will explore real-world case studies and gain hands-on experience in controlling and managing transport requests, while also acquiring the knowledge to drive operational excellence and improve change management within their organization’s SAP framework.

Course Duration

5 days

Course Objectives

- Understand the fundamentals of SAP Transport Management System (TMS) for managing transports across systems.
- Gain proficiency in Configuring and Managing Transport Routes in SAP environments.
- Develop skills in Change Control within SAP, including the use of tools like CTS
- Learn best practices for managing transport requests and ensuring system integrity.
- Understand the integration of Transport Management with other SAP modules such as BASIS and Security.
- Gain experience in monitoring and troubleshooting transport issues to ensure smooth transitions.
- Learn how to implement SAP Change Control processes for managing software updates and enhancements.
- Understand the importance of system landscape management and the configuration of transport layers.
- Develop expertise in handling transport logs and errors to diagnose issues and take corrective action.
- Explore advanced concepts in multi-system transport management, including complex routing and sequencing.
- Master the tools and techniques for Version Control in SAP, ensuring compatibility between various system versions.
- Learn to ensure compliance with regulatory standards through effective Change Control policies in SAP.
- Gain insights into the impact of Transport Management and Change Control on SAP system performance and scalability.

Target Audience

- SAP BASIS Administrators looking to enhance their knowledge in Transport Management and Change Control.
- SAP Functional Consultants aiming to deepen their understanding of transport and change processes in SAP.
- IT professionals responsible for system updates and release management in SAP landscapes.
- Project Managers overseeing SAP implementation projects or SAP system migrations.
- Change Managers interested in learning the effective implementation of change control processes in SAP.
- SAP Security Administrators focusing on integrating transport management with security settings.
- SAP Architects designing SAP landscapes and ensuring smooth system upgrades.
- Technical SAP Consultants working on system integration and configuration of SAP Transport Management.

Course Modules

Module 1: Introduction to SAP Transport Management System (TMS)

- Understanding the role of TMS in SAP landscapes.
- Overview of transport layers, routes, and domains.
- Configuring the transport directory and transport tool.
- How to create and manage transport requests.
- Case Study: Configuring transport routes for a multi-tiered SAP environment.

Module 2: SAP Change Control Overview

- The concept of Change Control in SAP.
- Key tools for Change Control.
- SAP Change Control and its role in system updates and software releases.
- How to plan and execute changes within an SAP environment.
- Case Study: Managing multiple transports across a global SAP landscape.

Module 3: Configuration of SAP Transport Routes

- Setting up SAP transport routes for development, quality, and production systems.
- Managing transport layers and defining the transport domain.
- Best practices for configuring transport routes in multi-client environments.
- Managing transport route issues and resolving common problems.
- Case Study: Configuring transport routes for a multi-country SAP implementation.

Module 4: Transport Logs and Error Management

- Interpreting transport logs for troubleshooting.
- Managing transport errors and reprocessing failed transports.
- Resolving issues in transport directories and buffers.
- Effective error management techniques to minimize downtime.
- Case Study: Resolving transport errors in a large-scale SAP upgrade project.

Module 5: Advanced Transport Management Techniques

- Handling complex transport scenarios like multi-system integration.
- Strategies for efficient transport sequencing and object selection.
- Managing large-scale transports and optimizing system performance.
- Transport optimization strategies for high-volume SAP environments.
- Case Study: Managing mass transports during a system migration.

Module 6: Change Control Policies and Compliance

- Establishing change management policies in SAP.
- Ensuring compliance with industry regulations through SAP Change Control.
- Best practices for audit trails and version control.
- Managing transport approval workflows and maintaining system integrity.
- Case Study: Implementing change control for regulatory compliance in a healthcare SAP system.

Module 7: Managing Transport Requests and Software Versions

- Understanding the lifecycle of a transport request in SAP.
- Managing transport versions and system compatibility.
- Handling versioning issues during system upgrades and patching.
- Techniques for optimizing transport workflows to reduce deployment time.
- Case Study: Managing transport requests during a version upgrade.

Module 8: Troubleshooting and Best Practices in SAP Transport Management

- Advanced techniques for diagnosing transport issues.
- Best practices for monitoring transport systems and minimizing disruptions.
- Automating transport management processes for improved efficiency.
- Effective communication strategies during transport outages or delays.
- Case Study: Post-implementation support for SAP Transport Management in a global rollout.

Training Methodology

This course employs a participatory and hands-on approach to ensure practical learning, including:

- Interactive lectures and presentations.
- Group discussions and brainstorming sessions.
- Hands-on exercises using real-world datasets.
- Role-playing and scenario-based simulations.
- Analysis of case studies to bridge theory and practice.
- Peer-to-peer learning and networking.
- Expert-led Q&A sessions.
- Continuous feedback and personalized guidance.

Register as a group from 3 participants for a Discount

Send us an email: info@datastatresearch.org or call +254724527104

Certification

Upon successful completion of this training, participants will be issued with a globally- recognized certificate.

Tailor-Made Course

We also offer tailor-made courses based on your needs.

Key Notes

a. The participant must be conversant with English.

b. Upon completion of training the participant will be issued with an Authorized Training Certificate

c. Course duration is flexible and the contents can be modified to fit any number of days.

d. The course fee includes facilitation training materials, 2 coffee breaks, buffet lunch and A Certificate upon successful completion of Training.

e. One-year post-training support Consultation and Coaching provided after the course.

f. Payment should be done at least a week before commence of the training, to DATASTAT CONSULTANCY LTD account, as indicated in the invoice so as to enable us prepare better for you.

Certification & Learning Methodology

- Hands-on practical delivery with real-world datasets, case studies, and lab exercises.
- Post-training mentorship, access to class resources, and customized follow-up support.
- Participants who successfully complete the course receive an accredited Datastat Certificate of Completion.

How to Enroll & Reserve Your Seat

1. Online Registration: Visit https://datastatresearch.org/courses/transport-management-and-change-control-in-sap-training-course to register online.
2. Email Booking: Send participant details to training@datastatresearch.org for official invoice & reservation.
3. Support & Assistance: Inquire via phone +254 724 527 104 | +254 734 969 612.
